14/10/11 (replaces 16/09/09) ref h2404 (cross-ref n/a), non-regulated, review by 16/09/2014 & at any change

Green Reaper NZ Ltd, P O Box 305298, Triton Place, North Shore City 0630 Ph 0508 247 336, email  
 info@greenreaper.co.nz, www.greenreaper.co.nz. Attention CDR Price  
 cc Tony Rumney, N.Z.F.S.A, PO Box 2835 Wellington (if co requested & regulated farm detergent or sanitiser).

To whom it may concern,

**Green Reaper Ltd GREEN REAPER,**

- Which is: pesticide (insecticide),
- For: Type B food areas where no possible contact with food, & contact surfaces, packaging & air vents,
- And status – factory - passed AsureQuality assessment (new),

**Passed AsureQuality assessment for food/beverage including dairy factory type B food areas with no possible contact (includes contact surfaces & packaging)" with conditions.** This excludes other animal products but may be a recommendation for NZFSA recognition or for RMP holders.

Conditions:

- General conditions: used per manufacturer instructions. Outside areas except with special conditions ..e.g. protected by sealed tube, localised application, & residues removed before food reintroduction.
- **Special conditions: we did not see instructions for use round food so please state the approval statement or all conditions therein & clarify use rates (high-20% & 5L/100m2?) see table. If "(contact surfaces & packaging)" was in instructions it could be deleted from the assessment statement.**
- Assessment conditions: Subject to notification of change, review within 5 years, inclusion of the assessment statement level of contact, and activation by (counter)-signing.

**Administration detail:**

- \*\* AsureQuality assessment (previously approval) is a non-regulated, voluntary, and evidential certification by the supplier, independently confirmed, without prejudice or guarantee, against checklist standards for food hygiene & safety as shown in the report attached for your verification. **It can be used in food programme purchasing or as a recommendation for specifically legislated NZFSA approval of farm dairy cleaners etc.** The word assessed is used for differentiation from NZFSA/regulated approval.
- The purpose of this work is to ensure that when used according to instructions products perform without compromising food safety, protect it when this is part of their function, and they should not have other apparent adverse effects for production.
- Compliance with HACCP risk standards is via coded identities linked to confidential appendices protected by legislation with a partial list of standards compliant or used listed: Animal Prods Act, Risk Management Programmes, Detergent & Sanitiser Manufacturer's COP, Detergent & Sanitiser Standards and analytical methods, AQ Quality Manual Approval Procedures & other s listed below.
- Raw material lists usually on page 1 is left to the concentrations table since there is non-contact.
