ClearSonic S2466x2/S2444x2 Setup Sheet

1. Remove S2466x2/S2444x2 panels from the box and inspect for damage.   Please contact your dealer to report any damaged items.

2. Stand up your panel and open it so that it is in a 'V' formation (see Figure 1). You can make it wider or narrower depending on your needs, but please make sure there is enough of an angle to prevent the panels from falling forward.

3. If you have multiple S2466x2/S2444x2, you can use the Velcro flaps to connect them together.
(see Figure 2)
