

Teethan[®]

Dental Contact Digital Analyzer

Millions of people suffer from occlusion problems, which often remain undiagnosed. Teethan[®] is FDA-cleared to analyze the activity of the masticatory muscles using electromyography technology, and provides an easy-to-read patient report.

Fast and Accurate

- Complete test results within minutes
- Validated software reliability

Teethan[®] may be used in evaluating the following disorders or applications:

- Malocclusion & temporomandibular disorder
- Orthodontics
- General screening
- Prosthodontics
- Implants
- Splint therapy

Innovative, Revolutionary Technology

Teethan[®] was designed and developed by experts with more than 30 years of experience in the biomedical field and over 20 years of experience in surface electromyography.
