

What do I get for my \$59.00? Just a Yes or No answer?

NO

You will get at least two folders of information and, in some states, three or four folders worth.

Folder One: a) Contact Names, addresses, phone, FAX, email of the people in the correct department within the Agricultural Department
 b) The various Duties of each person within the department

Folder Two: Research and Summary paper. With this, you will have a copy of every letter, emails that went back and forth with a timeline for all. You will know what transpired when, to the final answer (all in writing) from the Agricultural Department.

If there is a Folder Three: Additional Information. If your state requires a license or certification this folder contains some of the information you may need to attain what is required. I started the process of discovery for you. It also may contain other links that were shared by the department.

If there is a Folder Four: Failed Contacts. This folder contains the names people that I was unsuccessful in contacting. They may no longer be working for the Agricultural Department, etc.

The answer you receive was the “official answer” as of June 5, 2020. Now, on June 6th it may have changed thus, you still need to do YOUR due diligence and re-connect with the department. This is ALL public information. However, with your \$59.00 purchase, your process has been streamlined.

- 1) You know the person I spoke with successfully and how to connect with them.
- 2) You can send a copy of the “original letter” they received with the three questions they were asked to answer.
- 3) You can send them THEIR official answer as of June 5th
- 4) Finally, ask, “is this the same answer today as it was on June 5, 2020?” If not the same, could you please, in writing, give me an update.

We already have a case where one of the states REQUIRES a Certification AND License to apply. The restorer didn’t know this. They completed the water loss. The adjuster requested a copy of their license to apply the antimicrobial. They then stated, “it is our policy that we do not

pay for the illegal application of an antimicrobial.” WOW, more than \$59.00, never mind the legal jeopardy!

Let’s say your state does NOT require a license or certification, then why would I need this information?

Let’s say an insurance adjuster wants to see your license or a compliance officer taps you on the shoulder and wants to see it. You have documented proof that:

1. You did your due diligence and CHECKED! You didn’t WAIT to be questioned before knowing the answer.
2. The answer was straight from the Agricultural Department.
3. I believe you just gave your attorney some important information to protect you.

Call me, Barry Costa at (603) 547-5006 if you have any further questions!

Again, this is public information however I believe you are worth more than \$59.00 an hour.
