

# KITCHEN & BATH MEASUREMENT GUIDE

*YOU measure, WE design!*

# *Planning your dream kitchen*

## TIPS TO FOLLOW TO ACCURATELY MEASURE YOUR KITCHEN SPACE

Measure in inches to provide the most accurate measurements. Make a rough drawing of the shape of the room showing any walls, doors, windows, protrusions, or recessed areas, similar to the diagram shown on page 3, hand-drawn is fine.

1. Measure each wall from corner to corner or end of wall.
2. Measure from corner to window or door opening, not including window/door trim.
3. Measure each opening (window/doorway) from outer trim to outer trim.
4. Mark on your drawing the exact location of the sink plumbing, gas line and appliance locations.
5. Measure from floor to ceiling, note if there are any soffits.
6. Once you have completed the measurements add up the sections of each wall to make sure they total the full wall measurement.

Please use the attached measurement guide to mark down your dimensions.

Please make sure your measurements are 100% accurate to ensure that our designers will design a kitchen that will fit perfectly into your space.
