

Sideline® 50

Wall Insert Electric Fireplace

SIDELINE®50 FIREPLACE

80004 50" Wall Recessed Insert Electric Fireplace - Black

The Touchstone Sideline® was designed to meet the needs of contractors and do-it-yourself installers, who are looking for the beauty of a Touchstone fireplace mounted flush to a wall. We received so many calls from installers and contractors looking to mount our popular Onyx® in their wall. For all its great benefits, the Onyx®'s top-placed heat element makes flush mounting a no-no. So here you have the Sideline®, a 50" wide, electric fireplace with the same realistic flames and contemporary black frame of the Onyx®, but with a heat element that is placed in front of the frame. The Sideline® delivers the beauty of a fireplace without the fire and smokey smell. The Sideline® has 2 heat settings (high and low), and will heat a room up to 400 sq. ft.. Also, the fireplace's flame can be used without the heating feature. The Sideline® is simple to install and comes with easy to follow instructions.
