When [Kari Gran's](#) lip whip hit our office back in 2012 we were instant fans—it even made our [Best of list](#) that year. There's just something about the handmade, hand poured, organic and GMO-free gloss that leaves our lips feeling moisturized and looking pretty that we just can't resist. It's become our go-to gloss.

Well, Gran's got a new, just released, [lip whip tint](#): limited-edition, inspired by radiant orchid, the Pantone color of the year, blended with tingling peppermint oil and featuring a perfectly purse-sized lip brush.

We're smitten.
