# Kiss Me

BY TERRY HAWD

Pulling off the perfect lip takes more than a pout. From lip liners that complement every shade of lipstick to all-natural balms, plumpers and exfoliants that lay the groundwork for that final slick of lacquer, here are the tools you'll need to achieve the most elegant looks.

✦ **Jane Iredale PureMoist Lipstick** *Soho Sanctuary (119 Mercer St.), \$25* Available in 24 luscious shades, these all-natural lipsticks use orange-peel wax and avocado and sunflower oils for a rich feel that instantly quenches your lips. Infused with organic pomegranate and blackberry extracts, the lipsticks stimulate your senses with scents that border on aromatherapy.

✦ **Kari Gran Lip Whip** *rodales.com, \$15* The founder of this luxurious line was aiming for the little black dress of eco skin care. We love the sleek go-anywhere packaging of Kari's all-natural, hand-poured lip whip. It comes in naked or tinted options and is mildly scented with peppermint or cinnamon.

✦ **Skinn Collagenesis Lip Stem Rejen** *skinn.com, \$46* With an immediate cooling feel on the skin and an invigorating minty scent, this skin-firming cream, packed with antiaging peptides, aloe and green-tea oil, reduces the appearance of vertical lines and wrinkles around your mouth and enhances existing collagen for smoother skin.

✦ **Chanel Glossimer in Sunny** \$29.50, available at *Bloomingdale's* Summer's the time to get creative with color, so try a bright shade from CHANEL's new translucent Glossimer gloss line that's as airy as it sounds yet boosted with a bright color pop. The shade called Sunny leaves your lips looking glossy and chic with a hint of summery orange-sun-kissed, in other words.

✦ **Bella Schneider's Full Lips Lip Plumper** *labelle dayspas.com, \$16.50* Before you get lacquered and glossed, use this excellent nude lip plumper as a lipstick base to eliminate fine lines and create fuller lips. Key ingredients such as knotweed extract and beeswax lock in moisture and repair sun damage, leaving an overall healthier pout.

✦ **Natural Lip Crayon by Antonym** *rodales.com, \$16* The quest for the perfect lip liner that matches every lipstick shade is never-ending, but we're nearing the finish line with this nice and neutral shade by Antonym, an eco-minded brand that uses only natural ingredients. The mineral-based pigments in this stick are certified natural,

✦ **HydroPeptide Perfecting Gloss** *The Setal Club & Spa Wall Street, \$38* Effective on its own for a subtle lip look, or layered with your favorite lipstick to add a hint of color and shimmer, this high-quality lip gloss is infused with peptides to firm, moisturize and plump your pucker for a more lush look.

✦ **Exfoliating Radiance Gel** *lespau.com, \$36.50* Famed French cosmetics brand Phytomer is behind this luxurious lip scrub that's formulated to target small flakes of skin that plague delicate lip tissue. The mild acid exfoliant is made with red-algae extract and crushed apricot kernels to bring out the natural color of your lips.
