# WHAT'S NEW?

*New Products, Organic Oils, Color Trends*

**CAMELLIA OIL** Plant oils add gloss, nourishment and hydration to parched skin or hair, before or after shampooing. Camellia oil, extracted from the nut of the camellia tree, is a popular hair treatment in Japan, and it's becoming a hit here in the US. It is light, easily absorbed and loaded with essential fatty acids.

**Try:** A few tiny drops of this beautiful blend

of aromatic organic camellia, tuberose and rosemary oils, along with argan and jojoba, will make your skin and hair deliciously soft and silky. **Aroma M Camellia Hair Oil**, \$85 and **Aroma M Camellia Face Oil**, \$95; [aromam.com](http://aromam.com). For deep conditioning, apply **Phyto Subtil Elixir** before you shampoo, and leave it on dry hair for 10 minutes before rinsing. \$38.50; [aromam.com](http://aromam.com).

# WHAT'S HOT?

**JUICY** Inventors of **Juice Beauty Stem Cellular Repair CC Cream**, the first natural CC (color-correcting) Cream, Juice Beauty just launched Defining Eyeliner, Defining Mascara, Perfecting Foundation, Reflecting Gloss and Glowing Cheek Color into their,

well, juicy makeup collection. The gorgeous palette features mineral and organic fruit tints: "Makeup that feeds your skin!" says founding partner Karen Behnke. We love the **Glowing Cheek Color**, with antioxidant-rich organic acai and goji berries. [ulfa.com](http://ulfa.com)

**SPLASHY** The fun-loving team behind W3LL people—the "3" being "tree-hugger" James Walker, makeup artist Shirley Pinkson and cosmetic dermatologist Renee Snyder—just gave the super clean and stylish makeup line from Austin, TX a re-boot, to celebrate its fifth anniversary. "Our goal is to be able to sit in front of the most ardent purist and show how safe and healthy our brand is," says Walker. The entire line is infused with soothing organic aloe, to leave skin soft and supple. Look for the citrusy **Blood Orange Universalist Color Stick** for summer and warm **Fig&Honey** for fall. ## IT'S THE (LIP) BALM

We always keep a little lip balm at the desk to slather on throughout the day. Since we are a bit lippy, we look for the most luscious, lubricious little pots or tubes that we can find. That's why we love **Kari Gran Lip Whip** (Naked or Tinted), loaded with organic beeswax, oils of avocado, castor seed, calendula and peppermint or cinnamon bark, in reusable, recyclable pots, \$15; [kariгран.com](http://kariгран.com). For something tingly in a tube, try **S.W. Basics Vegan Lip Balm Cinnamon**, \$4; [spiritbeautyounge.com](http://spiritbeautyounge.com)
