

Vulcan Practice Pickleball Net System (10ft) Item ID: VNETPRAC

Frame Setup:

1. Take all components out of the case and sort them, all items are labeled.
2. Set End Base (#1) on a flat surface, insert Net Support Tube (#2) and Angled Tube Support (#3).
3. Insert Short Support Tube (#4) into Angled Tube Support (#3), followed by Long Support Tube (#5).
4. Repeat step 2. for parts (#1), (#2), and (#3) and insert to open end of Long Support Tube (#5).

Net Setup:

1. Slip one end of the net sleeve halfway down the Net Support Tube (#2).
2. Slip the other net sleeve all the way down the other Net Support Tube (#2) and slide the rest of the net sleeve all the way down.
3. Position the net sleeves in line with top white marker on the Net Support Tube (#2) on each side, which indicates the regulation height of 36".
4. Tighten the Velcro strap on each end of the net to keep net from sagging.
5. Attach small Velcro strap at the bottom center of the net to the net frame.
6. (Optional) To change net height for different drills and practice, use the lower white marker on the Net Support Tube (#2) one side to set the net height on either end at 34" (which is the standard height of the center of a regulation Pickleball net). To lower the center height of the net, fasten the center bottom Velcro strap on the net tighter.

Take down:

1. For easier disassembly & re-assembly, keep the Net Support Tubes (#2) in the net sleeves and roll net. Take down frame assembly reverse of the setup. Store frame components and rolled up net in carry bag.
