A20 Aviation Headset

For all types of aircraft

The A20 Aviation Headset is available in dual plug, 6-pin plug and U174 plug models and a variety of configurations designed for use in all types of general aviation aircraft, including helicopters.

The A20 headset gives you 30% greater noise reduction than conventional aviation headsets, so you'll enjoy a peaceful flight from short stops to long hauls. And at just 12 ounces, with sheepskin cushions and minimal clamping force, it's one of the lightest and most comfortable aviation headsets you'll find. All designed to let you focus on what matters—flying.

ACCLAIMED NOISE REDUCTION

30% greater active noise reduction than conventional aviation headsets.

COMFORTABLE, STABLE FIT

30% less clamping force than conventional aviation headsets.

ACTIVE EQUALIZATION FOR ENHANCED AUDIO

Automatically shapes and equalizes incoming signals for enhanced clarity and intelligibility.

BLUETOOTH CONNECTIVITY

Wirelessly connect to your Bluetooth-enabled devices.

CUSTOMIZABLE AUDIO PRIORITIZATION

Choose "mute" to immediately mute an auxiliary audio signal when receiving a communication. Choose "mix" to mix in-bound communication with your Bluetooth or plugged-in audio signal.

FULLY CERTIFIED

Certified to FAA TSO and E/TSO-C139 standards.

SIDE-SWAPPABLE MIC

Connect the mic to either the left or right earcup.

45+ HOUR BATTERY LIFE

From just two AA batteries.
