

Tapered Metal Tube Plugs JRRT9 & JRRT26

Application

For permanent sealing/plugging of leaky tubes in condensers and heat exchangers. Can be used to plug tubes or tube sheets.

Available sizes

Plug is available in sizes ranging from 1/4" OD to 1-1/2" OD. All gauges (BWG) are available. Larger plugs can be made as requested.

Tube Plug Type

Robinson offers two types of tapered metal tube plugs. Our JRRT9 style is a shorter drive in plug with an OAL of 1.860". Our JRRT26 style plug is slightly longer with an OAL of 2.750".

Specifications

- A solid metal plug with taper, which allows one plug to fit a variety of different gauge tubes.
- One piece tapered tube plugs available in Aluminum, Chrome Moly, Monel, Titanium, Brass, Naval Brass, Stainless Steel 304,316,317,416, Duplex, Alloy 20, Carbon Steel, SA105, Cupro Nickel (70/30 & 90/10), Hastelloy, Incoloy.
 - Tapered tube plugs are also offered in other materials other than metals, such as: Buna, Fiber, Neoprene, Silicone, and Phenolic.
- Special Materials and custom sizing made to your specifications upon request.
- One piece plugs allow for easy and safe installation. Plugs are hammered in and have the option of being welded in place.

Storage Instructions

Keep plugs out of direct sunlight and store in a cool, dry area. Plugs have a long and indeterminable shelf life.

How to Install

1. For the best seal insert plugs into clean, dry tubes.
2. Place small end of plug into tube (or tube sheet).
3. Drive plug into tube with light hammer blows. Option of welding plugs into place.

Additional Tools

Hammer

When Ordering

Have the outside diameter (OD) and gauge (BWG) or inside diameter (ID) of your tubes, tube material, and quantity of tube plugs needed. Tube plug and tube material should always match.

*One leaking tube needs two plugs; one for each end.
