

AGSOLUTIONS FENDER EXTENSIONS

Practical and Efficient! The AgSolutions rear tractor fender extension is an aftermarket part designed with the farmer in mind. Its simple installation and contour fitting design allows for an easy addition to your tractor. Aiding in keeping debris off of your windows and mirrors when conditions are not favorable. Each set or qty contains one left and one right fender extension plus mounting hardware and instructions. **“Always be safe when working around equipment, Do not ever stand on or use the AgSolutions fender extension as a step”**

SERIES 2 & 3

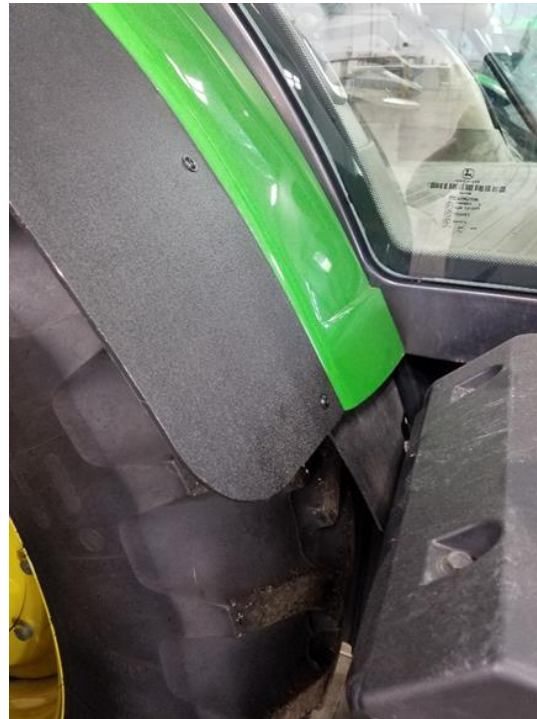

INSTRUCTIONS

<p>1. Remove parts from the shipping box.</p> <p style="text-align: center;">CORRECT</p>	<p>Check all brackets on each fender extension to make sure they did not get “twisted” or knocked out of alignment during shipping.</p> <p style="text-align: center;">INCORRECT</p>
<p>2. </p>	

3. To Install the AgSolutions fender extensions simply place the fender brackets over your existing fender working front to back.

4. Make sure the front of the fender extension and the front of your tractor's factory fender is in line as shown.

5. One at a time starting in the front use a 3/16" drill bit, drill a hole through the predrilled starting hole in the brackets, drill through the factory fender and bracket. "Make sure bracket is pushed up as far as possible before drilling"

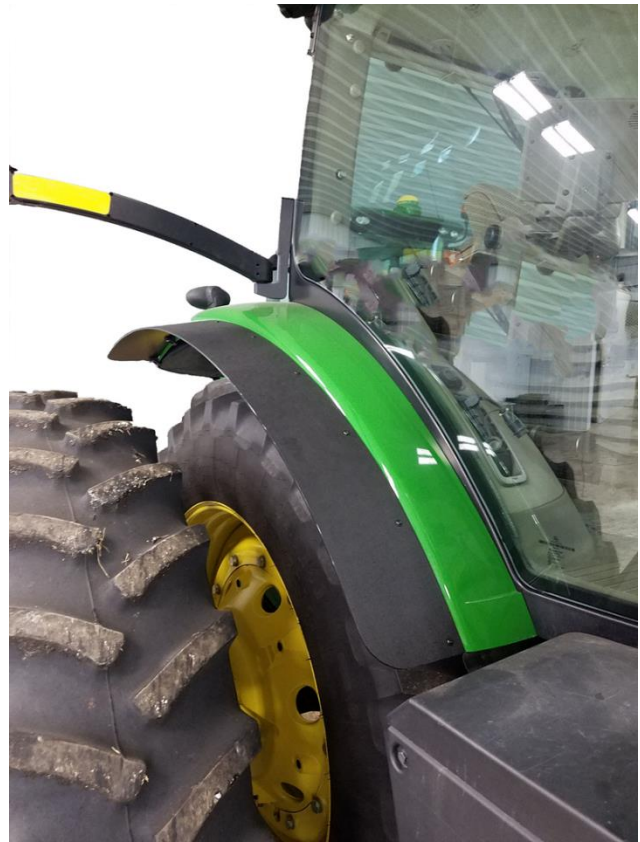

6. After drilling your hole, using a 5/32" Allen wrench insert the bolt through the factory fender and bracket and attach the square nut. Tighten down. "Be careful not to over tighten as could result in cracking the plastic".

7. The last bracket in the rear of the fender does not get drilled or hardware installed due to no clearance behind the bracket. This is OK it will still act as a support even with no hardware.

8. Final product is shown.
