

AgSolutions Shank Protectors

MOUNTING INSTRUCTIONS

PRODUCT DESCRIPTION

Protect your metal shanks with this shank protector to aid in excessive wear and glide through sticky soils. Resists friction that causes dragging and build-up.

1. Always be sure equipment is in lock or safe position before working under or around equipment.
2. Remove existing hardware on your shank and set cultivator sweep to the side.
3. Simply place new shank protector over your metal shank and return your existing sweep and hardware to where it was originally located.

4. Final product should look as shown.
