Welcome to the world's first home and hobby cutting machine with a built-in scanner.

300 dpi built-in scanner

Scan virtually anything – a hand-made drawing, a magazine clipping, cherished photos and more – create endless cut designs and save to the machine's memory.

Scan-to-cut-data

Scan in your design and save it as a cut or draw file. ScanNCut will automatically create cut lines.

7 fonts and 631 built-in designs, including 100 quilt patterns

Choose from basic shapes, borders, quilt patterns, fonts and more. Simply select a design, and then see it on your choice of material.

Fabric cut

Easily cut precise fabric shapes. By pairing the erasable draw function with cutting, you can draw your seam allowance and get precise sewing guidelines.

Direct cut

Scan your material, create the outline cuts and select your design straight from the surface to cut out. Remove the hassle of hand-cutting designs from your favourite papers and fabrics.

Pen Draw

With ScanNCut, you can change your cut file – whether it's from a previous scanned image or a built-in design – then recreate the design into a drawing in virtually seconds.

Welcome to a whole new world of innovation

Cut the previously scanned template

Score the butterfly template

Dot glue on the template

Write a sentiment on the bottom of the card

WLAN connection

Wireless connection allows you to send designs directly to and from your free online ScanNCutCanvas account. No need for cables or USB memory sticks.

Extra large 24" scanning area*

The new 12" x 24" (305 x 610 mm) scanning area is ideal for large wall art designs, 18" Doll patterns, large quilt designs and much more.

* large 24" mats are available as optional accessories

Scan any image or sketch, then precisely cut the shapes or outlines – without design cartridges or a PC.

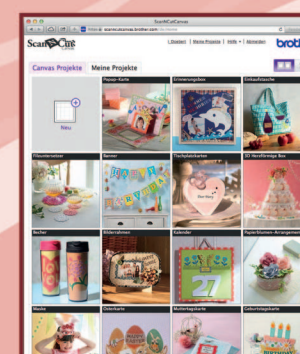

Cuts paper, fabric and more.

Great range of accessories available including Rhinestone Kit, Printable Sticker Kit and much more.

SVG Data readability

No more converting SVG files before cutting them out. The CM700 will read SVG cutting files directly, there is no need to convert them into FCM format first.

ScanNCutCanvas

A free cloud based web application that allows you to create and store your own designs on your computer or tablet. Designs can be transferred to the ScanNCut via USB memory stick, by direct USB or WLAN connection. ScanNCutCanvas also includes free projects to inspire your creativity.
