Quality and Security for all your Networking, AV and Data applications

Exceptional build-quality and a host of features. Everything you need in a compact, 19-inch wall enclosure.

The new **CAB-W9U-EL550G** is a feature-rich, small-height and shallow-depth data enclosure, powder coated with a hard wearing grey finish (RAL 7035).

With a 550mm depth (approx), this cabinet is ideal for restricted or tight fitting areas in which the normal, larger depth cabinets are not required. For example in residential homes, community areas or remote networking enclosures that do not need a large amount of enclosure space.

Fully built straight from the box, the CAB-W9U-EL550G features a front and of course reversible lockable door and front and rear vertical mount posts for secure equipment deployment.

Equipped with ventilation slots for increased equipment airflow and of course easy, single person installation makes the CAB-W9U-EL550G the ideal choice for all your small-scale equipment housing applications.
