

Wiring Instructions:

- 1.) Connect one wire from the switch to the terminal labeled “SECURITY 1” or “SECURITY 2” on the MTC
- 2.) Connect the other wire to the terminal on the MTC labeled “BATT NEG” or the common ground.

It does not matter which wire connects to which input

The magnet (no wires coming out of it) should be installed on the door hatch, or window that is being monitored. The switch (has the wires coming from it) should be installed on the adjacent bulkhead.

Siren Marine MTC

Connect to Magnetic Reed Switch
