

FEATURE AND SPECIFICATION COMPARISON GUIDE

Shiley™ Flexible adult tracheostomy tubes

The new Shiley™ Flexible tracheostomy tubes for adult patients feature several design advances, based on clinical input. The table below summarizes these design enhancements compared to the previous version of Shiley™ tracheostomy tubes.†

Traditional Shiley™ Tracheostomy Tube Product Line	New Shiley™ Flexible Adult Tracheostomy Tubes	COMFORT	
Flange			
<ul style="list-style-type: none"> ▪ Flange is more rigid. ▪ Opaque color does not allow visualization of underlying skin. ▪ Firm, opaque PVC material ▪ Soft Swivel neck w/ trach ties for securing 	<ul style="list-style-type: none"> ▪ Soft recessed flange is designed to reduce contact with the stoma site. ▪ Clear flange allows enhanced visualization of the underlying skin. 		
Material			
<ul style="list-style-type: none"> ▪ Sturdy PVC material 	<ul style="list-style-type: none"> ▪ Tube cannula is made with a softer material than that used in the earlier generation of Shiley™ tracheostomy tubes. 		
Cuff		HELPS WEANING	
Traditional high volume low pressure barrel shaped cuff	<ul style="list-style-type: none"> ▪ Low-profile TaperGuard™ cuff ▪ Reduces insertion force by 39% compared to the Shiley™ DCT tracheostomy tube cuffed.¹ ▪ Exerts 18.6%² less lateral wall pressure on the trachea than the Shiley™ DCT tube with a traditional barrel-shaped cuff.¹ ▪ The Shiley™ Flexible adult tracheostomy tube with TaperGuard™ cuff reduces fluid leakage by 96% at a lower cuff pressure versus the Shiley™ DCT tracheostomy tube.³ 		
Airflow			
<ul style="list-style-type: none"> ▪ Multiple products to provide the best airway airflow around the outer cannula 	<ul style="list-style-type: none"> ▪ Airflow around the outer cannula when the cuff is deflated has increased by an average of 242% compared to the Shiley™ DCT tracheostomy tube.¹ ▪ Improved airflow may reduce the work of breathing required to speak and wean from a tracheostomy tube.⁴ 		
Sizing		EASY TO USE	
<ul style="list-style-type: none"> ▪ Traditional Shiley Jackson sizing 4,6,8,10 	<ul style="list-style-type: none"> ▪ Expanded color coded Shiley Jackson sizing to include 4,5, 6,7,8,9,10 		
Connector			
<ul style="list-style-type: none"> ▪ 15-mm connector is part of the disposable or reusable inner cannula. 	<ul style="list-style-type: none"> ▪ Integrated 15-mm connector enables ventilation with or without an inner cannula. 		

Product code logic and sizing for the Shiley™ Flexible tracheostomy tubes

The first letters indicate a cuffed tube (CN) or uncuffed tube (UN)

The first number is the Jackson size

The second numbers indicate the ISO size as well as the inner diameter of the outer cannula

The last letter indicates disposable (A) or reusable (R) inner cannula

Specification Overview

- Equivalent outer diameter and inner diameter sizing (with the inner cannula in place)
- Equivalent tube length across disposable inner cannula product lines
- Tube length of previous Shiley™ reusable inner cannula product line is longer than Shiley™ Flexible reusable product line. The Shiley™ Flexible reusable tube length is now the same as the new Shiley™ Flexible disposable tube length
- Cuff resting diameter has changed due to the lower-profile cuff on the Shiley™ Flexible tracheostomy product line
- Additional sizes available in the Shiley™ Flexible tracheostomy product line

1. Based on internal testing comparing the Shiley™ Flexible adult tracheostomy tube with TaperGuard™ cuff to the Shiley™ DCT tracheostomy tube cuffed. Data on file.
2. Internal testing results Athlone 2013. Results reflect measurements taken for size 7.5 Shiley™ Flexible adult tracheostomy tube compared to the Shiley™ 6DCT tracheostomy tube at 20 cm H₂O. Data on file.
3. Internal benchtop testing results Athlone 2013. Results reflect testing the Shiley™ Flexible adult tracheostomy tube with TaperGuard™ cuff, disposable inner cannula at 20 cm H₂O versus the Shiley™ DCT tracheostomy tube with disposable inner cannula at 25 cm H₂O.
