THANK YOU FOR CHOOSING UTV STEREO PRODUCTS

Thank you for choosing UTV Stereo products. Your purchase of this UTV Stereo product for use in your UTV indicates your desire for reliability and performance audio that only comes from UTV Stereo.

UTV Stereo is your premier audio manufacturer. We offer the highest quality products designed for your SXS. Stay one step ahead when you purchase UTV Stereo products.

To take full advantage of the UTV Stereo 6.5" Kick Panels, please read and follow the instructions in this manual.

Designed for high performance audio systems, these enclosures are built rugged to withstand the elements. These 6.5" Kick Panel Enclosures have been designed specifically for use in SxS's!

INSTALLATION

Professional installation by an authorized UTV STEREO dealer is highly recommended! Otherwise, the performance of your new gear may not be satisfactory. In the event that you decide to do your own installation, please read and follow this manual very carefully. Failure to do so may compromise the integrity of this product or your vehicle, and possibly void this product's warranty.

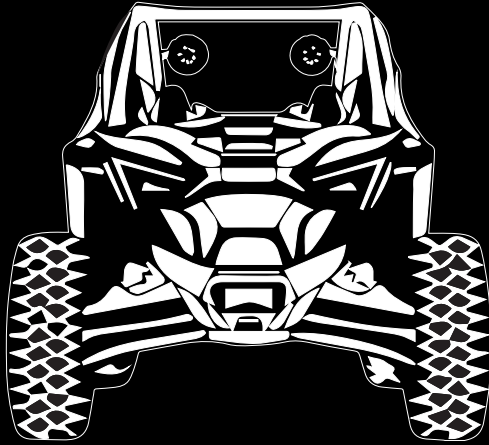

X3 6.5" KICK PANEL INSTALLATION

Designed to fit PERFECTLY into the kick panel location in your vehicle.

INSTALLATION INSTRUCTIONS: UTVS-X3-KP65

- Step 1:** Disassemble front fenders and upper dash panel to expose where the UTVS-X3-KP65 enclosures will be mounted.
- Step 2:** Starting with the driver side kick panel --- Re-install factory screw in kick panel to ensure the kick panel plastic does not shift during install (*Reference Figure# 1*).
- Step 3:** Using mounting "A" flat mounting plate -*Reference "Included Parts List"*-, slide it behind the frame tubing then place one "C" frame tube clamp onto driver's side frame tubing and align flush with the kick panel plastic. **Do not tighten bracket on the X3 frame tubing at this time** (*Reference Figure# 2*).
- Step 4:** Measure gap for driver's side. This gap should measure **1.25"** from the bottom edge of the plastic panel to the center of the bottom hole in the bracket (*Reference Figure# 3*).
- Step 5:** Mark holes with a marker. Remove bracket and set aside. Using a 1/4" drill bit, drill the marked holes through plastic panel (*Reference Figure# 5 & 6*).
- Step 6:** Repeat steps 2-5 for passenger side bracket using the "B" deep mounting plate and "C" frame tube clamp. The gap between the bottom edge of the plastic panel and center of the bottom hole on the passenger side bracket should measure **1"** (*Reference Figure# 4*).
- Step 7:** Once holes are drilled in plastics following steps 2-6 above, align bracket to drilled holes and secure it to the crossbar tubing using the supplied hardware.
- Step 8:** You must drill a hole for speaker wire to feed through on passenger side (*Reference Figures# 7 & 8*).
- Step 9:** Take UTVS-X3-KP65 enclosures and feed speaker wires through the rubber grommet on the back of each enclosure. Mount kick panel enclosures to secured mounting brackets using supplied hardware. Make connections to speaker and mount speaker into the mounted kick panel enclosures (*Reference Figures# 9 & 10 and Speaker Instructions*).
- Step 10:** Route wires from mounted kick panel enclosures to amplifier.
