### INSTRUCTIONS

**Step 1:** Remove hood.

**Step 2:** Remove the 2 speed clips & 4 torx screws on the upper dash and remove dash.

**Step 3:** Remove passenger side fender. (Reference picture 1)

**Step 4:** Remove passenger upper dash pocket. (Reference picture 2)

**Step 5:** Remove both bolts on the front passenger cage.

**Step 6:** Move the inner fender up and out of the way. Without having to completely remove the inner fender you can zip tie the fender up to the roof. (Reference picture 3 & 4)

**Step 7:** Relocate GPS antenna wire from the ride command under the cross bar and back into the ride command unit. (Reference picture 5 & 6)

**Step 8:** Remove bolt from driver side fender. (Reference picture 7)

**Step 9:** Slide amp mount into place. (Reference picture 8)

**Step 10:** Screw in self tapper through the provided holes on the amp mount. (Reference picture 8)
