INSTRUCTIONS

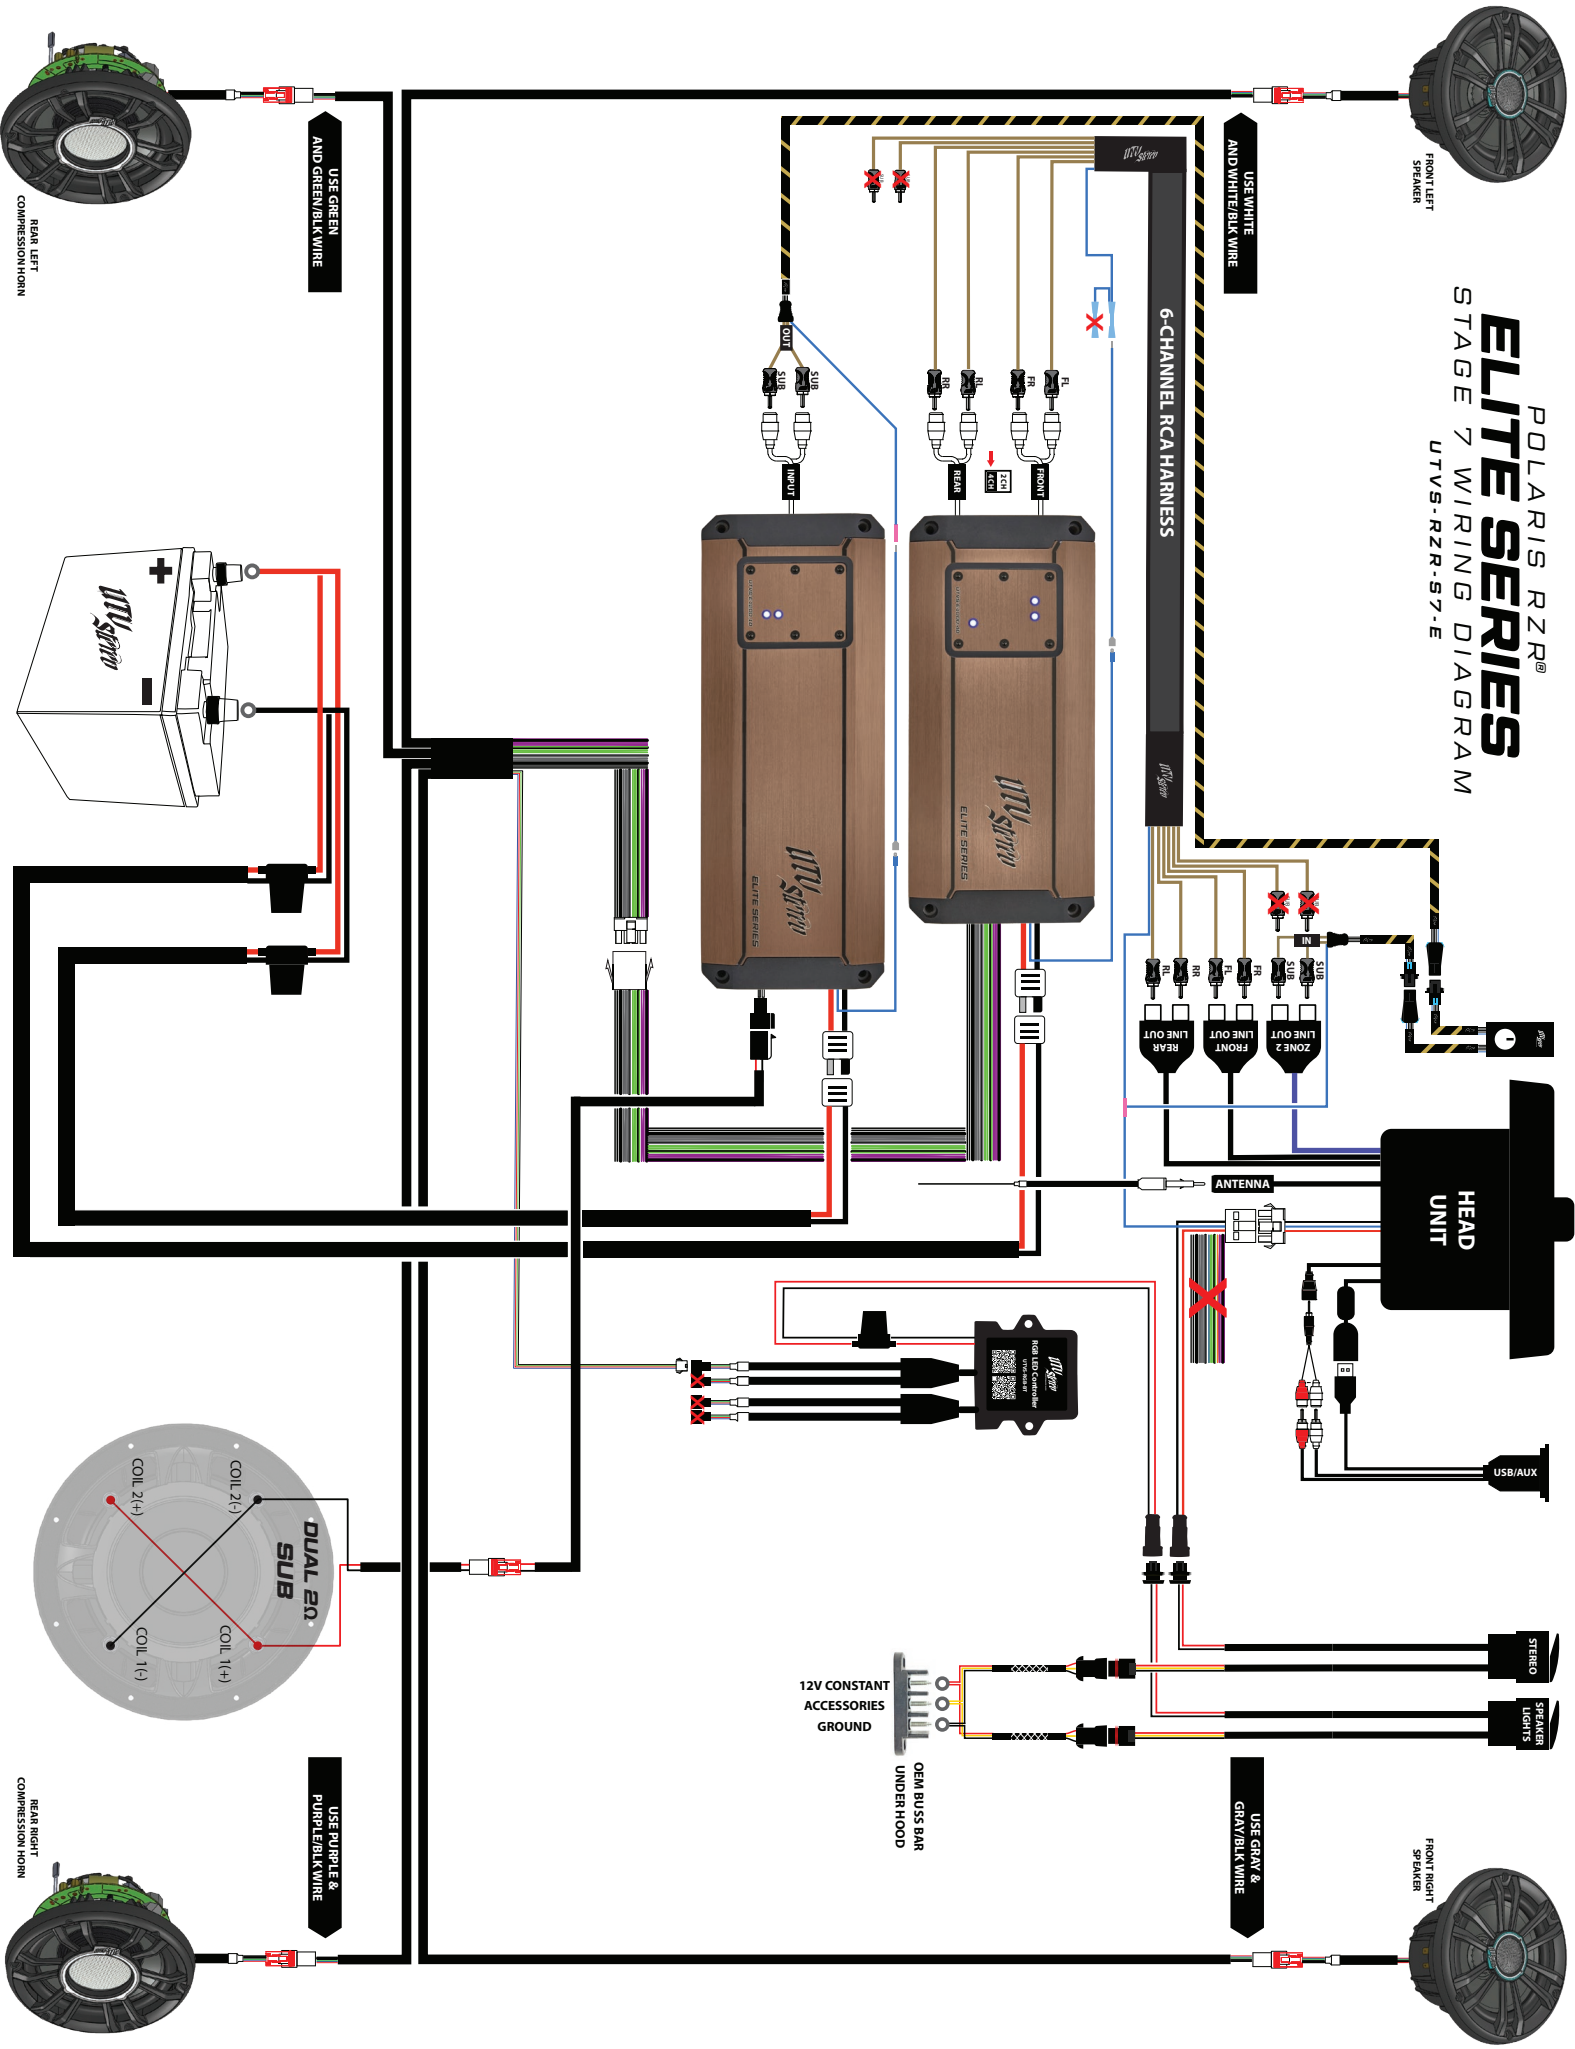

FOLLOW INSTRUCTIONS TO INSTALL YOUR UTV STEREO STAGE KIT

Each individual part has its own specific install instructions and/or install video that can be found on that particular items page at utvstereo.com
Use this resource to install each part individually.

- Step 1:** Remove seats and disconnect the battery.
- Step 2:** Disassemble upper and lower dash. Remove any panels to expose where the amplifier mount will be mounted. (Reference [Triple Amplifier Mount Instructions](#))
- Step 3:** Remove both front and rear center consoles / cup holders to expose where power harnesses will be routed. (Reference [Power Harness Instructions](#))
- Step 4:** Remove center glove box.
- Step 5:** Remove passenger glove box.
- Step 6:** Install sub into sub box enclosure. (Reference [Sub Box Instructions](#))
- Step 7:** Install sub box into the vehicle and route wires to where the amplifier will be mounted. (Reference [Sub Box Instructions](#))
- Step 8:** Install amplifier mount. (Reference [Triple Amplifier Mount Instructions](#))
- Step 9:** Install amplifier onto amplifier mount.
- Step 10:** Route power harness from the battery up to the amplifier. REMOVE FUSE DURING INSTALL. (Reference [Power Harness Instructions](#))
- Step 11:** Install source unit into pocket mount. (Reference [Pocket Mount Instructions](#))
- Step 12:** Install pocket mount into center glove box pocket. (Reference [Pocket Mount Instructions](#))
- Step 13:** Connect power wires from the source unit to the source unit harness. Connect source unit harness to bus bar and mount the switch. (Reference [Source Unit Harness Diagram on page 3](#))
- Step 14:** Connect and route remote wire and RCA wire from source unit to amplifier. (Reference [Wire Diagram on page 3](#)) (If you have a rear camera, reverse trigger, or USB/AUX connect them during this step)
- Step 15:** Install RGB controller harness switch. Connect and route RGB wires and RGB controller near the amplifier. Route bus bar wires to bus bar. (Reference [RGB Controller Kit Instructions](#))
- Step 16:** Install kick panels and cage pods. (Reference [Kick Panel](#) and [Cage Pod Instructions](#))
- Step 17:** Connect speaker wire and RGB wire to all speakers. Install speakers into kick panels and cage pods. (Reference [Kick Panel](#), [Cage Pod](#), and [Speaker Instructions](#))
- Step 18:** Route wires from speakers to amplifier or RGB controller and make connections. (Reference [Wire Diagram & RGB Controller Wire Diagram on page 3](#))
- Step 19:** Install fuse into power harness and reconnect the battery.
- Step 20:** Power on and tune amplifier. (Reference ["Tuning" on page 4](#))
