Asbestos Awareness Training COURSE OVERVIEW

This course focuses on highlighting the importance of managing Asbestos in the workplace. Asbestos is a hazardous material that poses a risk to health by inhalation if the asbestos fibres become airborne and people are exposed to these airborne fibres. Exposure to asbestos fibres is known to cause mesothelioma, asbestosis and lung cancer. It is important for employees who may work in buildings that contain asbestos to know where it is likely to be found and how to avoid exposure.

After completing this course, you will be able to:

- Identify relevant OHS/WHS legislation that applies to asbestos
- Identify asbestos
- Identify likely asbestos containing material
- Know the health effects of exposure to asbestos
- Establish and maintain safety procedures
- Identifying when a license is required when removing asbestos
- Identifying the requirements for selection and use of relevant PPE
- Acquire knowledge and understanding of asbestos removal
- Safety requirements of working with asbestos

QUALIFICATION:

A Certificate of Completion is issued on successful completion.

PRE-REQUISITES:

Will be over 18 years of age and are expected to be able to speak and read English to a sufficient standard to complete the course.

DURATION:

Online (Self-paced)

JURISDICTIONS:
