### SECURITY STYLE

Finish Height	HDG	HDG & Painted
1500mm	✓	✓
1800mm	✓	✓

- 2300mm wide panels
- Panel includes 6 straight brackets
- Pedestrian gates made to order

### Custom Style

Do you have a style in mind that is not in our brochure? We can also custom-make fencing in almost any style. Let us know what you require and we will provide a quote to have it made to your specifications.

Our fence panels and side gates are constructed from steel tube which allows for a lightweight, yet strong product. The panels and pedestrian gates are fully welded on all joints and are protected by hot dip galvanising after fabrication which offers the best protection for steel.

## FENCE POSTS

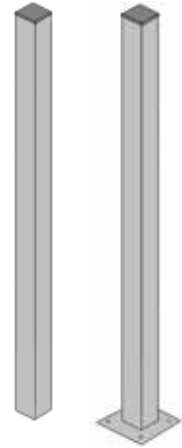

Posts can be concreted in ground or bolted to concrete or other permanent surface. A post cap is included with each post.

### 50 x 50mm HDG Steel

- 1900mm or 2200mm in-ground
- 1050mm, 1300mm or 1600mm posts with flat base

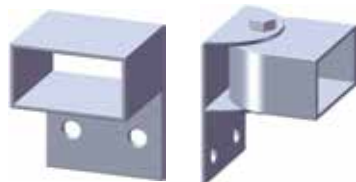

### 60 x 60mm HDG Steel

- 2500mm in ground
- Posts with flat base made to order
- Suitable for security fencing or larger pedestrian gates

## BRACKETS

Fence brackets slide over the end of the horizontal rails of the fence panel and are fixed to the post. This provides a quick and effective fixing method. We can also supply swivel brackets suitable for fencing on angles.

## HINGES

Our range of hinges includes plain hinges, fixed tension sprung hinges, adjustable tension sprung hinges and steel ball bearing hinges for heavier pedestrian gates.

## LATCHES

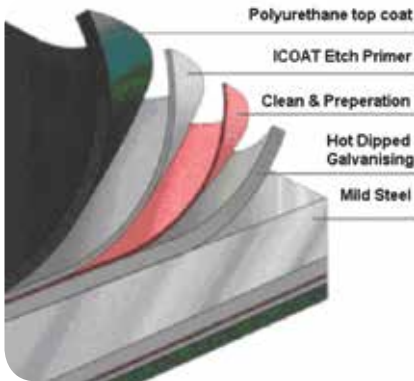

We offer an extensive range of gate latches which provide different levels of security to suit your needs. Our most popular gate latches include lockable D-latches, keyed latches and Magna latches for pool gates.

## COATING

Red Stag Gates & Fences Ltd proudly offers a high quality painting service to paint their gate & fencing products. Working together with PPG; world leaders in automotive finishes; a paint system has been developed to provide a durable coating system suitable for painting over hot dipped galvanised products. The painting takes place in the purpose built paint facility at the Red Stag Gates & Fences premises in Hamilton. The latest technology in electro-static paint guns and equipment has been utilised to ensure the quality of the coating is up to the highest possible standard.

## PAINT SYSTEM

The paint system begins with rigorous preparation of the substrate. Then etch priming to provide adhesion and added corrosion protection. The final topcoat of the painted product is a two component polyurethane topcoat that gives you the protection of your finished product. This will cure to a hard yet flexible finish with excellent resistance to weathering that will protect and enhance the visual image of your Gates & Fencing products.

*Paint Warranty: We offer a 3 year warranty on the paintwork and application of painted products. Please see the warranty document for the terms & conditions on the warranty.*

## Standard Colours

*(Note: These printed colours are a guide only. Colours are designed to match powder coating colours as close as possible)*

Matt Black	Ironsand	Permanent Green	Charcoal	New Denim Blue	Arctic White
------------	----------	-----------------	----------	----------------	--------------

Other colours and colour matching service is available, but may incur delays and/or extra surcharge.
