Massage Redefined™

R.6

## FEATURES

### DeltaWave™

At the core of the R.6 lies the technology to transform your entire state of being. Our proprietary DeltaWave engine is designed to deliver an intuitive and life-like massage. In addition to basic movements, the DeltaWave 4D engine uses advanced massage algorithms to mimic the hand movements of a massage therapist.

### Back AutoScan

Like a shiatsu master examining the curvature of your spine, the Back AutoScan reads your unique shape and selects the appropriate shiatsu points for your neck, back and glutes.

### L-Track

Imprinted with the wisdom of Okabayashi sensei, the L-Track system mimics the unique shape of your body and releases tension throughout your entire back—beginning at your neck and moving down to your lumbar spine and glutes. Rest, rejuvenate and feel restored as increased blood flow delivers healing and mobility to your upper, mid and lower back.

### Automatic Recline and Zero Gravity

As your experience begins, the R.6 automatically reclines between 123° and 157° to distribute even pressure with each soothing massage movement. The R.6 also offers a zero gravity recline that cradles your body for maximum comfort while improving circulation, increasing lung capacity and gently decompressing the lumbar spine.

### Mid-Century Modern Design

The R.6 was imagined as a Mid-Century Modern statement. With its premium wood grain trim, it is designed to integrate perfectly in any well-appointed living space.

### Wall Hugging

Find the perfect location for your R.6. With only a 6.25" (16cm) gap requirement between the upright backrest position and a wall, you can create a tranquil space just about anywhere within your office or home.

### Heat

The R.6's heating units in the back, seat and feet soothe and loosen stiff muscles, preparing them to get the most out of the massage.

### Foot Rollers

Find sweet, soothing relief for tired feet. These carefully choreographed, two-way rollers gently work pressure points on the soles of your feet.

### Multi-Language Remote

Designed to be simple and intuitive, the easy-to-read user interface allows you to adjust and monitor your massage. Ten languages are available, including English, Japanese, Korean, Chinese (Simple and Traditional), Vietnamese, German, Spanish, Russian and French.

### Air Massage

Air cells in the R.6's shoulders, arms, seat, legs and feet provide soothing relief with customizable levels of compression.

**Maximum User Weight** 265 lbs (120 kg)

**Recommended User Height** 5' 0" (152 cm) to 6' 5" (195 cm)

**Designer** Ken Okuyama

**Massage Choreography** Akira Okabayashi sensei

**Warranty** 3-year Limited; extendable to 5-year Limited

# OHCO™

Massage Redefined™

A pleasant interjection. A subtle exclamation.  
A word that demonstrates a peaceful emotion.

OHCO is a feeling created from the wisdom of a shiatsu master, the talent of a visionary designer and unprecedented massage technology. These elements give OHCO the ability to transform the ancient art of massage into a luxuriously timeless experience.

With thoughtful direction, your OHCO chair transports you to a state of deep relaxation and renewal. Calculated, precise movements mirror the hands of a shiatsu master—melting tension and awakening your senses. Envelop yourself in complete serenity as the unexpected becomes a part of your everyday.
