AV150 Other Settings (PS) Menu

Remote:

Basic AccuVoice is indicated by a RED led at the fourth position.

Secondary AccuVoice is indicated with a VIOLET led.

Surround mode is indicated by a BLUE led.

The "PS" setting menu:

With the unit powered ON, press and hold the Other Settings (PS) button for five seconds. All four LEDs will quickly flash (Blue, Yellow, Orange then Red). This indicates you are in the PS setting mode. Use the volume up/down buttons to make the desired selection.

	LED1	LED2	LED3	LED4	
PS1				*	Sony
PS2			*		LG
PS3			*	*	Samsung
PS4		*			Vizio
PS5		*		*	Panasonic
PS6		*	*		ZVOX remote only
PS7		*	*	*	Auto ON/OFF enabled
PS8	*				Auto ON disabled
PS9	*			*	AccuVoice Mode 2A (D)
PS10	*		*		AccuVoice 2B
PS11	*		*	*	AccuVoice 2C
PS12	*	*			AccuVoice 2D
PS13	*	*		*	AccuVoice 2E
PS14	*	*	*		AccuVoice 2F
PS15	*	*	*	*	Reset (Restores unit to default)

When you first activate the PS-menu, the default PS-number is PS-7:

PS7		*	*	*	Auto ON/OFF enabled

This allows you to then press the volume up button once to activate PS-8 for "Auto On/Off Disabled." Shown as:

PS8	*				Disabled

You will have about 20-seconds before the process times out and each time you press volume up or down to select a different PS-number, the 20-second clock re-sets and starts again.

Once you have selected a PS-setting you want, you can either wait the 20-seconds for the process to time out, or, you can press the Other Settings (PS) button once and the display will flash your selected PS-setting three times then go out.

When you select a setting of PS-1 through PS-6, then that becomes the default PS-setting you see the next time you access the Program Settings menu, even if you select PS-7 through PS-14 at a later date.

So if you previously set it for PS-5 for Panasonic you will see the yellow and red lights:
*   *

Choosing PS-15 restores the factory settings, so if you do that, then the default PS-setting becomes PS-7 again, until you choose PS1 through PS-6.

Easier Way to Turn OFF the Auto On/Off Feature:

Power the unit ON, and then press and hold down the power button on the ZVOX remote control. After 6-seconds of holding down the power button on the remote, you will see the lights behind the speaker grille blink three times to indicate whether the Auto On/Off is enabled or disabled:

PS7   *   *   *   Auto ON/OFF enabled

PS8   *   Disabled

Pressing and holding down the power button on the remote for another 6-seconds will change the Auto On/Off setting again. Whichever lights you see blink three times is the selected setting.

Input select is indicated by the first LED. Green = Analog, Blue =Digital.

Volume down is indicated by the second, Yellow LED.

Volume up is indicated by the third, Orange LED.

Mode is indicated by the fourth LED. Red=AccuVoice 1, Violet =Accuvoice2 Blue=Surround.
