Your Current TV Remote Can Control Your AV200/205.

After following the steps outlined in this guide, your cable or satellite remote will adjust the volume output from your soundbar system. Please Note: If you have a DirecTV remote control, use the DirecTV remote guide included along with this instruction sheet. The steps involve pressing the Volume, Mute, and Power buttons of your preferred remote control with the remote positioned close to the numeric display of the soundbar. Once complete, the soundbar will respond to the buttons it has learned from your preferred remote control.

To insure accuracy, the learning routine records each button’s commands twice, then confirms a successful button learning. ZVOX® Audio has specific instruction sets available for a variety of popular remote controls. These instructions provide an alternate method for configuring your AV200/205 to respond to your preferred remote control. If you cannot easily teach the AV200/205 to respond to your preferred remote control, please contact ZVOX Audio about additional instructions for your preferred remote control.

PREPARE

Stand or sit within easy reach of the soundbar’s control buttons (the end on your right hand side).

You will need to press two buttons on the AV200/205 end panel to start the learning process. Then you will press four buttons on your preferred remote control.

Locate the following buttons on your remote control:

1. VOLUME UP
2. VOLUME DOWN
3. MUTE
4. POWER

The learning process involves pressing these four buttons in sequence.

This remote is only an example. Your remote is probably different. Please locate these buttons on your remote.

Press both VOLUME buttons on the soundbar until “Lrn” appears (about 4 seconds). Then release both VOLUME buttons.

- Get ready to press VOLUME UP on the Remote Control.

When UP 1 appears, press VOLUME UP for 1 second. You should see ----.

When ---- appears, press VOLUME DOWN for 1 second. You should see ----.

When ---- appears, press MUTE for 1 second. You should see ----.

When ---- appears, press POWER for 1 second. You should see ----.

LEARN BUTTONS

1. VOLUME UP
2. VOLUME DOWN
3. MUTE
4. POWER

YOU ARE DONE!

If you see the “no change” message (noCH) during the learning routine, the AV200/205 system did not accept the infrared code. The current step in the learning routine will repeat.

Error Message of the AV200/205 Learning Routine

1. VOLUME UP
2. VOLUME DOWN
3. MUTE
4. POWER
