4a. Controlling the ZVOX Soundbar
Using Your Preferred Remote Control:
Your preferred TV remote control can control Volume, Mute and Power on the ZVOX soundbar. See the separate instruction sheet that describes the process of teaching the ZVOX SB380 to respond to these commands. The ZVOX soundbar remote will always provide a full range of adjustments, along with your preferred remote.

Button functions on the soundbar remote control

Volume
The VOLUME buttons operate in the normal manner.

Power (STANDBY)
The Power button toggles the soundbar between STANDBY and On. Note: A soundbar automatically enters STANDBY if it is silent for longer than approximately 30 minutes. A soundbar will turn back on when it senses a restored digital signal.

Input Selection:
A brief press and release of the INPUT button on the soundbar remote control allows you to select between the four separate inputs on the soundbar.

Input 1—digital
Input 2—digital
Input 2—analogue (RCA jacks)

Output Leveling
Press this button to prevent large changes in volume. When engaged, it boosts quiet dialog and lowers the output of loud passages.

Accuvoice
Press this button to increase the clarity of most voices. Pressing Accuvoice overrides the current Surround setting. A second press returns the soundbar to the last-used Surround setting.

4b. End Panel Controls
on the Soundbar

On the viewer’s right end of the soundbar are four buttons.

A) POWER button:
This button turns the soundbar “ON” if it is in STANDBY. If this button pressed briefly while the soundbar is “ON”, it will mute and unmute the soundbar.

B) Volume Up/Down rocker button
Adjusts volume up and down. Pressing either side of this button will “unmute” the speaker if it is muted.

C) Input button:
A brief press and release of the INPUT button selects the next input in sequence.

5. Tonal Profile Setting
The soundbar has three settings to better match the acoustics of its room position.

Face Front........ PS16 - on a flat surface, facing front.
Face Up........ PS17 - on a flat surface, facing up.
Wall mount........ PS18 - on a vertical surface, facing into the room.

The default setting for the soundbar is Face Front.

If your soundbar’s position is Face Up or Wall mount, you should select PS17 or PS18 from the PS menu.

PS Menu:
you bring up the PS menu by pressing down on two buttons on the end panel of the soundbar: Power (c) and Volume Up (c). After about five to seven seconds you should see PS start flashing. The first time you bring up the PS menu, it should show “PS 0”. Once you see the PS display, release the buttons. Then press and release the Volume Up button to increase the PS number. Continue pressing and releasing the Volume Up button until you reach the setting you want: PS16, PS17 or PS18.

For further information about the options provided by the PS menu, see the separate information sheet Soundbar Adjustment Options, available online at ZVOX Audio’s website.

Setup & Operation
Don’t Worry It’s Pretty Easy.

STEP 1
Position The System.

STEP 2
Connect One Signal Cable.

STEP 3
Connect The Power cable.

STEP 4
Use the Soundbar remote to turn on power and adjust volume.

What’s In The Box
Soundbar • Remote control • Instruction sheets
AC power cord with integral power supply • Optical Digital and Analog signal cables

Home Theater Made Simple!

Still need assistance? If your home TV system does not conform to the descriptions in this guide, don’t hesitate to send an inquiry to info@zvoxaudio.com or call ZVOX Audio at (866) 367-9869. Please provide your TV brand and model number. A ZVOX Audio representative should be available (Eastern Time Zone) 9:30 AM to 7:30 PM Monday through Friday.

6. Soundbar Wall Mounting Information
Dimensioned diagrams of each ZVOX Audio soundbar model can be found on ZVOX Audio’s website.

The soundbar has two keyhole mounting sites on its back panel. You can mount the soundbar onto two screwheads using these mounting sites. A ZVOX Audio soundbar weighs between 15 and 20 pounds. NOTE: It is the installer’s responsibility to ensure the screws are installed into the wall or other surface securely and that the screwheads are the correct size for the hanger mounts on the rear of the soundbar. ZVOX Audio recommends your mounting sites be able to support at least twice the weight of the soundbar.
Important Safety Instructions

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

Grounder/Polarsation—This product may be equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

Afterthoughts—This product is equipped with a three-wire grounding-type plug. It has a third (grounding) pin. This plug will only fit into a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding-type plug.

Ventilation—Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating. These openings should not be blocked or covered. The openings should be located so that they do not interfere with proper ventilation. The openings should also be unobstructed for use of the apparatus. The manufacturer’s instructions have been adhered to.

Class III apparatus with double insulation, and no external earthing or earthing type connections shall not be connected to the power supply. This apparatus must not be connected to the power supply.

CAUTION: Danger of explosion if the remote control battery is incorrectly replaced. Replace only with the same or equivalent type.

WARNING: The remote control battery (battery or batteries pack) shall not be exposed to excessive heat such as sunshine, fire or the like.

No naked flame sources, such as candles, should be placed on the apparatus.

Special Safety Warnings Regarding Placement of the ZVOX System and Other Equipment

Stable Placement. Do not place the ZVOX system on an unstable cart, stand, bracket or table. The ZVOX system must be left in its original packaging until set up is complete. To avoid personal injury and to reduce the risk of damage to the apparatus, use only with carts, stands, brackets, or tables recommended by the manufacturer or sold with the apparatus. While moving the apparatus, always lift it from the floor. Do not slide it on the floor.

Excessive heat. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.

Ventilation. Always place any ZVOX product in an area where it is well ventilated. Do not place over any radiators or heat registers or in areas where the ventilation may be impeded. Avoid humid areas or areas subject to dripping or splashing water. Do not place near any hot water or steam pipes such as those that may be in walls or ceilings. Avoid direct sunlight, excessive heat, fire, or the like.

Electrical shock. To prevent electrical shock, plug the power cord into a properly grounded power outlet. If you are unable to insert the plug fully into the outlet, contact an electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding-type plug.

CAUTION: Do not connect any audio output connection to the Warning Indicator. If the system is operated with any audio output connection to the Warning Indicator, the system may be damaged.

Optical Audio Output Jack (see above image)

Most HDTV's have an optical digital audio output jack. Use the provided optical cable to connect the TV's output jack to optical input 1 on the soundbar.
