### 4a. Infrared Remote Control Features of the SoundBase

**Learning:** You can “teach” the SoundBase to respond to your current TV remote control for the following functions: Volume, Mute (on/off) and Power (on/off). See the separate sheet for instructions. After this “learning” process, you will not need the SoundBase remote control for adjusting Volume, Mute and Power. Teaching the SoundBase to respond to your preferred remote does not affect the included SoundBase remote. The SoundBase remote will still provide its full range of adjustments.

**Input Selection:** Pressing the INPUT button allows you to select a different input. Inputs are selected in the following order:

- **Input 1**—digital (optical jack)
- **Input 2**—digital (optical jack)
- **Input 3**—digital (coaxial jack)
- **Input 4**—analog (RCA jacks)
- **Input 5**—analog (RCA jacks)
- **Input 6**—analog (front mini jack)

**Remote Control Capabilities**

- **Mute**
- **Volume**
- **Power (STANDBY)**

**Surround Settings**

- **Surround One** ("Sd 1") has low virtual surround effect and strong vocals. Use this setting if vocal clarity is important to you.
- **Surround Two** ("Sd 2") has moderate virtual surround effect and moderate vocals. Most people prefer this setting for most program material.
- **Surround Three** ("Sd 3") has strong virtual surround effect and moderate vocals. Many people prefer this setting when watching movies.

**Output Leveling**

Press this button to prevent large changes in volume. When engaged, it boosts quiet dialog and lowers the output of loud commercial breaks. It also reduces volume swings between cable or satellite channels. This feature can be used along with any of the three Surround settings.

**Accuvoice**

Press this button to increase the clarity of most voices. Pressing Accuvoice overrides the current Surround setting. A second press returns the SoundBase to the last-used Surround setting.

**Internet streaming HD video audio:**

If your TV features a internet connection and displays HD streaming content, it may be necessary to select Dolby Digital or PCM digital audio in the TV or from the streaming provider’s inputs on the TV and the SoundBase. Outputs. If you connect directly to a set top box and a DVD/Blu-ray player, you need to switch inputs on the TV and the SoundBase.

**Blu-ray disc audio:**

If you don’t get sound from a Blu-ray disc, the digital audio on that disc may be encoded using a proprietary format. In this case, use the Bluray disc menu or the Bluray player menu to select Dolby Digital or PCM digital output.

### 4b. SoundBase Front Panel and Rear Panel

#### SoundBase Front Panel Inputs and Outputs

### Setup & Operation

**Don’t Worry It’s Pretty Easy.**

1. **Place the system on furniture.**
2. **Connect one signal cable.**
3. **Connect the power cable.**
4. **Use the SoundBase remote to select the correct input and volume.**

**What’s in the box**

- SoundBase system
- Remote control
- Instruction sheets
- AC power cord
- Optical digital and Analog signal cables

**Still need assistance?** If your home TV system does not conform to the descriptions in this guide, don’t hesitate to send an inquiry to info@zvoxaudio.com or call ZVOX Audio at (866) 367-9869. Please provide your TV brand and model number. A ZVOX Audio representative should be available (Eastern Time Zone) Monday through Friday 9:30 AM to 7:30 PM and noon to 4:00 PM on Saturday.

**Important Safety Instructions**

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong is provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the appliance.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

**Special Safety Warnings Regarding Placement of ZVOX System and Other Equipment**

**Stable Placement.** Do not place the ZVOX system on an unstable cart, stand, bracket or table. The ZVOX system may fall, causing serious injury to a child or adult and serious damage to the product. Do not use the ZVOX system on any unstable surface.

**Placement of a TV on the ZVOX system.** A television that weighs less than the cited limits and that has a base that is smaller than both dimension limits (shown below) can be placed on top of a ZVOX system—BUT ONLY WHEN THE FOLLOWING SAFETY PRECAUTIONS ARE STRICTLY OBSERVED: PLACING A TV ON TOP OF A ZVOX SYSTEM WITH THE FOLLOWING PRECAUTIONS IS DANGEROUS AND SHOULD NOT BE DONE.

- **SoundBase 570:** The TV must weigh 110 pounds (50 kg) or less.
- **SoundBase 670:** The TV must weigh 140 pounds (64 kg) or less.
- **SoundBase 770:** The TV must weigh 170 pounds (77 kg) or less.

**A TV heavier than 110 lbs (50 kg) should not be placed directly on top of a SoundBase 570.**

- **SoundBase 770 and 770:** The TV must weigh 140 pounds (64 kg) or less.
- **The base of the TV must measure less than:**
  - **Width:** 41.5 in (1060 mm)
  - **Depth:** 17 in (440 mm)
- **SoundBase 670:** The TV must weigh 120 pounds (55 kg) or less.
- **The base of the TV must measure less than:**
  - **Width:** 31.5 in (800 mm)
  - **Depth:** 15.75 in (403 mm)
- **SoundBase 570:** The TV must weigh 110 pounds (50 kg) or less.
- **The base of the TV must measure less than:**
  - **Width:** 23 in (600 mm)
  - **Depth:** 14 in (367 mm)

**Install the ZVOX system on a solid and flat surface.** Be sure to prevent the ZVOX system from changing position after installation.

**A TV heavier than 140 lbs (64 kg) should not be placed directly on top of a SoundBase 670.**

- **SoundBase 870 and 770:** The TV must weigh 170 pounds (77 kg) or less.
- **The base of the TV must measure less than:**
  - **Width:** 41.5 in (1060 mm)
  - **Depth:** 17 in (440 mm)
- **SoundBase 670:** The TV must weigh 120 pounds (55 kg) or less.
- **The base of the TV must measure less than:**
  - **Width:** 31.5 in (800 mm)
  - **Depth:** 15.75 in (403 mm)
- **SoundBase 570:** The TV must weigh 110 pounds (50 kg) or less.
- **The base of the TV must measure less than:**
  - **Width:** 23 in (600 mm)
  - **Depth:** 14 in (367 mm)

**Installs the ZVOX system on a solid and flat surface.** Be sure to prevent the ZVOX system from changing position after installation.

**Important Notes:**

- **Almost all HDTVs use an optical digital audio output, which you connect to the SoundBase's optical input using an optical cable.**
- **Almost all HDTVs have an audio output, which you can connect to your SoundBase.** You can also connect an RCA jack analog audio output to Analog Input 4.

**Coaxial Digital Output**

A few TVs, set top boxes and DVD-Blu-ray players have a coaxial digital audio output. You can connect this output to the coaxial digital audio input on the SoundBase using a cable with an RCA phono plug at each end.

**Program Sources with an Analog Audio Output**

If your TV set does not have a digital audio output, you could connect the TV set’s analog audio output to an analog audio input on the SoundBase system.

An analog audio input on the SoundBase is also useful for connecting portable devices with an audio output. For instance, the headphone output of a smartphone or music player could be connected to the SoundBase front panel minijack. This requires a cable with a stereo minijack at both ends. The minijack headphone output from a TV could be connected to one of the rear panel inputs. This requires a cable with a stereo minijack at one end (to fit the TV headphone jack) and Red/White RCA plugs at the other end (to connect to the ZVOX back panel).

**Important Notes:**

- **You can connect an RCA jack analog audio output to Analog Input 4.**
- **You can connect a minijack analog audio output to Analog Input 4.**

**3. Connect the AC cord**

After making the signal connection, connect the AC power cord to the back of the speaker. Then, connect the AC power cord to an AC power receptacle. Turn on the speaker using the power switch on the back panel next to the AC cord.

**AC cord connection to SoundBase back panel.**

**If your home TV system does not conform to the descriptions in this guide, don’t hesitate to send an inquiry to info@zvoxaudio.com or call ZVOX Audio at (866) 367-9869.
