Position the soundbar.

Face Front

Face Up

Wall Mount

Place the soundbar on stable, flat surface. Ensure all components are stable and secure.

Connect the power cord.

First

DC Power Input

Then

AC power receptacle

Connect to Optical Audio Output of TV.

Optical Audio Output

Connect one end of an optical digital cable to the TV's optical digital Audio Out jack.

Back of TV

Back of soundbar

Connect to Optical Input 1 of soundbar.

Soundbar Optical Input

Connect the other end of the optical cable to the soundbar's Optical Input 1.

Other Possible TV Audio Outputs

RCA Jack Analog Audio Out

A red/white pair of RCA jacks on the back of the TV labeled OUTPUT. Do not connect to RCA jacks labeled INPUT.

“Minijack” Analog Audio Out

Some TVs use a minijack output or headphone jack. Do not use a minijack labeled INPUT.

Coaxial Digital Audio Output

A ZVOX Audio soundbar does not support direct connection of a coaxial digital audio cable. To use a coaxial digital audio output, you need either a coaxial digital to optical digital audio converter OR a coaxial digital to stereo analog audio converter. Contact ZVOX Audio at info@zvoxaudio.com to learn what sources are available for a suitable converter.

Confirm you hear TV sound through the soundbar.

With a digital audio connection, you should hear the TV sound through the soundbar with the soundbar's volume set to 12-15. You select one of the four available inputs using the INPUT button on the soundbar's remote control.

Select an input on the soundbar using the remote control or the end panel.
