## Section 1

## Instructions

1. Assemble your six square pegboards as shown below. Cut out the six patterns and tape together in the same way. If you are using clear pegboards, slide the actual-size pattern underneath them. Place your beads on the pegboards as shown.

| 4 | 5 | 6 |

2. Ask an adult to fuse your designs-see page 6 for further instructions.
3. Assembly: Mount your finished design to heavy cardboard or foam core with a quick-drying adhesive. Use pins to mark the places you have visited.

## Fusing Instructions-Only Adults Iron

1. Place your pegboard on a flat, heat-safe surface.
2. Set a household iron to the medium setting. Place ironing paper over the pegboard. In a circular motion, begin to iron the project. Do not press down with the iron. As the beads begin to fuse, you will see circles of the beads start to show through the paper. When ironed properly, the beads will still have an open center. Let the design cool.
3. Remove the paper and bead design from the peg board. Flip the design over to expose the non-fused side. Repeat step two. Let cool completely.
NOTE: Beads need heat for about 10-20 seconds per side to fuse evenly. Lift the paper occasionally to see how the beads are fusing. Depending on the size of the project, additional heating time may be required. DO NOT OVER-IRON the beads as it will make the centers of the beads close and can make the assembly you do with your project more challenging.
