Instructions

1. Download the 747 Airplane templates. Using 2 large square interlocking pegboards (2 basic large squares can also be used) complete all the airplane pieces.
2. Cover completed pieces with the ironing paper. Keeping the iron level, gently iron the beads in a circular motion for about 10 seconds to fuse the beads evenly. Do NOT over iron the beads or it will be difficult to assemble.
3. Once the design is cool, peel off the ironing paper. Lift your design from the pegboard; flip the design over and repeat step #2. Continue this process until all pieces of the airplane are done.
4. Gently attach the airplane wings to the airplane body as shown.

5. Turn airplane upside down. Carefully add the engines and landing gear to the underside of the wings and plane body.

6. Add the plane tail to complete your Perler Beads 747 Airplane!
