Instructions

1. Download the Space Shuttle and Flames Templates.
2. Using two large interlocking square pegboards (or two large square pegboards) complete the shuttle project.
3. Cover the project with the ironing paper. Keeping the iron level, gently iron the beads in a circular motion for about 10 seconds to fuse the beads evenly.
4. Once the design is cool, peel off the ironing paper. Lift your design from the pegboard; flip the design over and repeat step #3.
5. Next using one large square pegboard complete the flames. Follow directions #3 and #4 to iron the flames.
6. Slide the flame base through the opening at the bottom of the shuttle; push down to lock the notch into place. Your shuttle will now stand up!
