

PREMIUM BLACK ANGUS BEEF™

January 2nd, 2020

To Whom It May Concern:

Live animals for our Black Angus program are selected according to phenotype or genotype and all animals comply with the AMS GLA Schedule. Our employees responsible for Black Angus identification were trained for the selection of animals in the program by Agricultural Marketing Service representatives.

Prior to slaughter, only Black Angus cattle are admitted to the holding area. Our trained, designated employees display program identification while performing live animal identification. USDA meat graders are on site to oversee the operation. We have an animal identification and segregation program on file at our slaughter facility and it is available for review by FSIS officials at any time.

Sincerely,

Ken Robinson
