

KAYAK FOLDING RACK Model # 12-8601

Mounting Rack to Wall

Tools Needed : Tape Measure, Electric Drill, $\frac{1}{8}$ " Drill Bit, and #2 Phillips Head Driver

The length of your boat will determine arm spacing. Ideal arm spacing is 40% of total boat length, (boat length X 0.4 = spacing).

Locate studs where arms will be mounted and mark desired height for the Folding Rack at base of support arm. Use a mounting bracket as a template, and a mounting screw to mark the locations for holes. Wall studs are typically on 16" centers. It is important that at least one screw from each mounting bracket goes into a wood stud.

1. Pre-drill pilot hole for Phillips Head screw using a $\frac{1}{8}$ " drill bit.
2. The second hole will typically miss a single stud. Screw a plastic anchor into the hole. **Note:** *If you were lucky and hit a stud on both holes, skip this step.*

Pro Tip: An old woodworkers trick is to rub the screw threads on a bar of soap for easy installation.

3. Insert a screw through 2 brackets. Use #2 Phillips Head Driver to insert Phillips head Screws into the stud.
4. Leave loose for insertion of arm.
5. Insert arm in bracket. Tighten both screws.
6. Mount second arm at same height as the first arm.

| PARTS LIST | |
|------------|--------------------------|
| Qty | Name |
| 2 | Folding Rack |
| 8 | Plastic Mounting Bracket |
| 8 | Mounting Screw |
| 4 | Plastic Anchor |

Holds up to 75 LBS

Use

1. Arms fold against wall when not in use and pivot out from wall when ready to use.
2. Rubber pads are adjustable. Using a small amount of liquid soap between metal tubing and rubber padding makes adjustments easier.
3. Paddles & PFD's can be stored on lower hook.

Rev. 11/19
