Use

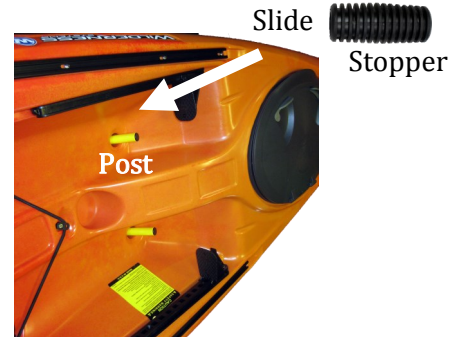

1. Adjust scupper posts to match width of scupper holes from the top side of the kayak. See photo.

2. Tighten clamps to lock scupper posts into loading position. Remove cart from top of kayak.

NEW! Turn your Suspenz cart into a sand cart with a Balloon Wheel Conversion Kit (Model #22-2219). Includes two 12" X 7" wheels & hand held air pump.

3. Tilt kayak on its side. Insert cart posts into scupper holes from bottom side of the boat. Slide rubber stopper onto protruding scupper post on top side of the boat. This will prevent the cart from falling out of scupper holes when flipping the boat.
4. Lift one end of the kayak while the other end remains on the ground. Rotate the boat right side up and lower until cart wheels are on the ground. Do not pivot the kayak on a cart wheel when rotating it right side up. This can damage the scupper holes and/or the cart. See video for complete instructions.

Caution: Do not tilt/leverage boat or cart on its edge when turning it over as it can cause damage to kayak and/or cart.

Care

Rinse cart after each use to clean off sand, salt and mud.

Caution

This cart is designed for hand towing only. It is not intended to be pulled behind a bicycle or motorized vehicle.
