

AIRLESS END CART

Model # 22-8899 (L)

Model # 22-0099 (XL)

Scan* to see Video
Instructions for Assembly & Use

*QR code reader app required

Holds up to 150 LBS

Large Model #22-8899

Designed for Boats up to 28" Wide

X-Large Model #22-0099

Designed for Boats greater than 28" Wide

Assembly

Tools Needed:

10mm & 19mm wrenches (or adjustable wrenches), Phillips Head Screwdriver

1. Place *Cart Frame* on floor with upper crossbar laying on top. Slide the *Aluminum Posts* into *Cart Frame* with axles facing out (**Photo #1**).
2. Bolt *Wheels* to *Cart Frame*: Remove *19mm locknut* and *metal washer* from axle (**Photo #2**), slide *10" airless wheel* over white plastic sleeve, add *metal washer* and firmly secure with *locknut*, making sure the wheels turn freely. Tip: Tighten the locknut until the wheel does not turn, then back off the locknut one-half turn.
3. Position the *Cart Frame* as shown in **Photo #1**. Disassemble the *Lower Crossbar Assembly* (**Photo #3**) and place parts inside the *Cart Frame* as shown in **Photo #1**.

AIRLESS END CART

Model # 22-8899 (L)

Model # 22-0099 (XL)

(Instructions, continued)

4. Attach *Lower Crossbar Assembly* to *Cart Frame*: Insert *Phillips head bolt* and *metal washer* through the *Unpadded Crossbar*, add the *Contoured Washer* (contour facing the yellow cross bar), and put bolt through the *Aluminum Post*. Add the second *Contoured Washer* (flat side against the bare *Aluminum Post*). Place the *Padded Crossbar* onto the bolt, add the *Metal Washer* and secure with *10mm locknut*. (finished assembly shown in **Photo #4**) Tip: Use a wrench to hold the nut and Phillips screwdriver to tighten.
5. Repeat Step 2 on other side of *Lower Crossbar Assembly*. The upper crossbar and unpadded crossbar should be on the same side of the cart frame.
6. Tighten all bolts so *Cart Frame* can still fold.

Photo #4

Care

Rinse cart after each use to clean off sand, salt and mud.

Caution

This cart is designed for hand towing only. It is not intended to be pulled behind a bicycle or motorized vehicle.

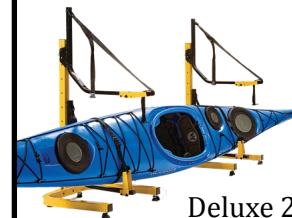

Use

- Adjust height of the side tubes (approximately the depth of your boat plus 4") so that the upper crossbar rests on top of the boat with the cart angled forward as shown in picture.
- With the cart leaning forward at about a 45 degree angle, slide either end of boat into the cart opening with the boat keel sitting in the bottom "V" padding. Note: Hull geometries vary. If boat does not rest on the padded crossbar, turn the cart around 180 degrees so that it does.
- The boat should slide in about $\frac{1}{4}$ - $\frac{1}{3}$ of the boat's length.
- Adjust bungee cord length and connect it to a secure place on the boat.
- Lift opposite end of the boat and away you go!
