Instructions:

1. Slide the large loop on **Cable A** (the long cable) over one end of the boat and continue to slide it toward the center of the boat until the loop fits snugly on boat.
2. Slide the loop on **Cable B** (the short cable) over the opposite end of your boat, with the small loop facing down, until it fits snugly as well.
3. Securely wrap **Cable A** around any **stationary** object (i.e. Suspenz Storage Racks, car-top rack, tree, dock post, etc.) so that the cable is taut while having the small loop on **Cable A** slightly overlap the small loop on **Cable B**, with little to no slack. If there is any slack, wrap the cable again and attach your padlock.
4. When securing the cables to your vehicle, ensure the cable is tight enough so the lock does not dangle to where it can hit glass or metal.

Caution:

- ◆ These locking cables are meant to hinder theft
- ◆ They are **NOT** to be used as tie-downs for your watercraft on a vehicle

Rev. 04/19
