

Toro Irrigation Mini 8 Series Rotor

15mm (1/2") Single Stream Rotor

Toro offers the new Mini 8, a 15mm (1/2") gear-drive rotor that provides value.

It serves as the perfect in-between fit for your applications where the landscape is too big for sprays, but too small for a full-size rotor.

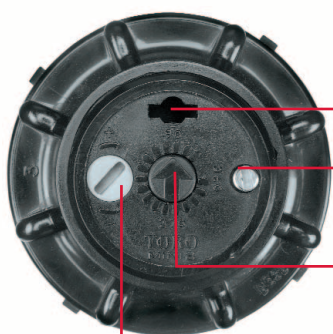

When using a 15mm (1/2") rotor, you can water efficiently, thereby saving money (and water).

The cost to irrigate is less per square metre and compared to fixed-sprays, it requires fewer stations to cover an area.

The MINI8-4P comes with 5 nozzles, pops up 95mm and is fully adjustable from the top of the sprinkler.

Combined with the 300 and 340 Series, it gives Toro the most comprehensive range of 5-10m rotors on the Australian market.

Add Mini 8 to your fixed spray and rotor offering and have all the tools you need to irrigate residential and commercial landscapes most efficiently and effectively.
