## What is catgrass?

Cat grass, also known as “pet grass” is a popular healthy treat cats and other pets love.

Cat grass comes from cereal grains such as wheat. It can be grown indoors, year-round in about 2 weeks.

## Why feed it to your pets?

Cat grass is widely recognized as a natural and healthy treat for many kinds of pets including cats, dogs, rabbits and hamsters.

Many pets also love the fresh taste and smell of cat grass.

## Why grow it at home?

Growing cat grass at home is a fun and easy way to give your pet the fresh and healthy treats they love.

With our grow kits, in less than 2 weeks, your pet will be enjoying their fresh cat grass for up to 10 days.

## Enrich your pet's diet.
