Tri-fold TATAMI MATTRESS

IKEHIKO

IKEHIKOJAPAN.COM

WHY TATAMI MATTRESS?

1

IF YOU OWN A FUTON, YOU SHOULD HAVE IT.

Traditionally, futons are supposed to be used in tatami rooms with tatami mats laid wall-to-wall. The tri-fold tatami mattress brings the authentic tatami experience, preventing slipping and adding extra cushioning and support, all in a lightweight package.

2

IT KEEPS YOUR FUTON DRY AND MOLD-FREE.

We sweat more during sleep than we think. It is difficult for futons to get rid of the moisture that accumulates if laid directly on hardwood floors. Tatami's moisture absorbing ability prevents the futons from being musty, keeping them dry and fluffy all the time. The tatami mattress provides noise insulation as well.

*IKEHIKO's
tri-fold tatami
mattress is the best
companion for your futon.
Lightweight and foldable.
Stored away in a
breeze.*

3

IT PURIFIES THE AIR.

Tatami mattress uses only domestically grown igusa (Japanese rush). It is experimentally proven to absorb unpleasant odors and harmful substances such as nitrogen dioxide and formaldehyde.

4

IT BRINGS THE FOREST IN- DOORS.

Trees are some of the nature's greatest healers. Study shows that forest bathing reduces stress, lowers blood pressure, improves concentration, strengthens the immune system, and has anti-cancer benefits. Igusa has the major active component in forest bathing, phytoncide. Relax with the tatami mattress anytime.
