THE IMPLEMENT RANGE – TASKA® 180° REVERSIBLE LAND RAKES

Leaves a Finish That Can Simply Be Re-Seeded & Rolled.

CTM have developed a new range of Land Rakes for the UK market, aimed at people that keep a lot of animals on a small acreage. The last couple of years have been particularly tough on the land, with the wet summers causing heavy hoofed animals to churn the land up, giving it no time to recover.

The TaskA Land Rake has been designed to eliminate this problem.

With its unique curved diamond pattern tines, it will penetrate and shatter the heaviest of clay land and with its adjustable levelling blade, it makes short work of repairing the damage.

The Land Rake can be turned 180°, giving it the capability of being a lot less severe, ideal for harrowing and levelling surfaces.

One machine that can do lots of different jobs from repairing paddocks, harrowing grass, finishing cultivated land for a seedbed, levelling uneven ground and arenas to repairing roads, raking gravel driveways, etc. The TaskA Land Rake is adaptable and tough enough to handle the lot.

1.2m Reversible Land Rake

1.5m Reversible Land Rake

2.0m Reversible Land Rake

All prices are ex-works CTM and are subject to VAT at the current rate.
