HOP HOUSE INSTRUCTIONS & SAFETY RULES

OPERATING RULES

ADULT SET UP ONLY

DO NOT USE IN WINDY
CONDITIONS

NEVER LEAVE CHILDREN
UNATTENDED

NOTE: Air leakage from the product is normal to prevent from over-inflating while under constant airflow. Do not try to seal or repair seams. For fabric tears, use the included patch kit.

WARNING: Follow staking instructions. Users must use and follow staking instructions to ensure proper number of stakes used, soil conditions, and stake installation.

INFLATING, STAKING, AND SET UP: Read warning label on bounce house and blower before set up and use.

ADULT SET UP ONLY

1. Remove Hop House from the box or storage bag and unfold completely onto a flat surface, 6.6 ft (2 meters) away from any objects.
2. Tie fabric tube securely to the blower. Make sure the fabric tube isn't obstructed or twisted in any way and that the cord is not under the unit. Tubes should be kept straight to allow proper airflow.
Please note that Hop House - Slide has an additional, shorter fabric tube that must be securely tied closed to ensure the Hop House properly remains inflated.
3. Plug blower into GFCI protected receptacle.
4. While the bounce house is unoccupied, ensure the blower is away from any debris and switch power ON. Blower should remain on and continuously inflate bounce house while in use and occupied. Airflow through seams is normal.
5. After fully inflating, ensure the bounce house is still 6.6ft (2M) away from objects on all sides and begin staking.*
6. Hop Around!

**Secure the bounce house with 6 provided stakes to flat ground with firm soil or grass. Stakes should be placed straight into the ground, not at an angle and should be driven to ground level to prevent tripping. For indoor use, use at least 120 lbs of anchoring equipment evenly distributed and tied down to stakeholders.*

HOP HOUSE INSTRUCTIONS & SAFETY RULES

OPERATING RULES

DEFLATING AND STORAGE

Adult Deflation Only

1. Ensure Hop house is unoccupied and turn the blower OFF. Untie fabric tube from blower to allow air to escape. For Hop House - Slide, untie both tubes to allow this.
2. Once the bounce house is deflated completely, remove stakes or indoor anchoring equipment.
3. Allow bounce house to dry completely before rolling up and storing
4. Store in provided bag in a cool dry place away from direct sunlight until next time.

REPAIR

Warning: Repair patches must be applied by an adult only. Keep out of reach of children. Repair patch is not a toy.

Airflow through seams is normal. Do not try to repair on seams.

Repair Patch Instructions

1. Deflate the bounce house, clean the area and allow to dry thoroughly.
2. Cut a portion of the patch to the size needed and round the corners into a circle or a square with four rounded corners.
3. Position the patch over the damaged areas and remove any bubbles. Hand sew the outer edge of the patch using a small needle & thread.

MAINTENANCE

- Store in a cool dry place in provided bag, away from direct sunlight or extreme weather.
- Check product periodically for any damage or potential hazards such as but not limited to: damaged cord, plug, housing, parts, worn or deteriorated fabric. In the event such damage is found, the product should not be used until properly repaired.
- Cleaning: use a dry or damp cloth with a non-flammable, non-toxic cleaner or water. Allow the product to fully dry before rolling up and storing.
- Store blower with cord loosely coiled.

HOP HOUSE INSTRUCTIONS & SAFETY RULES

OPERATING RULES

BLOWER MAINTENANCE

- Check product periodically for any damage or potential hazards.
- To clean, make sure the unit is unplugged and wipe with a damp cloth but never immerse in water.
- When not in use, store the blower inside, unplugged, on a flat stable surface.
- Store cord loosely coiled next to blower.
- Do not operate blower with a damaged cord or plug.
- Do not cover cord and be aware of tripping hazard.

BLOWER INFO

- Do not attempt to service the blower.
- Caution: electrically operated product.
- Warning: use only on GFCI protected receptacles. Use standard grounding standards to prevent electric shock.
- Keep away from water, traffic, fire hazards, or debris including but not limited to leaves and dirt.
