

ConnectID Carts

Deploy your existing IT equipment
exactly when and where you need it

FALCONA

INSPIRED
INNOVATION

CONNECTING YOUR PEOPLE

The Falcona ConnectID Cart range is designed with ultimate flexibility in mind.

These tough, mobile workstations provide independent power for your IT equipment, easily supporting a host of applications. Custom shelving options with printer, scanner and PC mounts built-in are just part of the appeal.

The integrated multi-stage battery charger keeps our mobile workstations ready to go 24/7. You can choose to run the unit from the dual battery pack, doubling the power capacity, or alternatively, one battery can be charged separately and hot swapped when power is running low.

Falcona's rugged mobile workstations increase staff productivity as they take their computers and tools with them, enabling them to work at any location.

This mobility improves freedom and efficiency as workers no longer need to go back and forth from one point to check information – with the MPS 1500 and 2000, the information they need is right there at their fingertips, at all times.

The mobile carts are ideal for receiving, inspecting, recording, warehouse labelling and re-routing of products in and out of goods receiving. Tasks such as inventory checks, quality control monitoring, product labelling and packaging can be handled using the same mobile workstation, removing the need to walk to fixed locations.

Additionally, any computer-based training can be performed away from the manufacturing floor, to avoid interfering with busy teams.

Workers can use a computer or touchscreen tablet for a full standard 8-hour shift, depending on the amount of scanning and printing required, thanks to the on board 240 volt power supply.

FEATURES & BENEFITS

Rugged mobile workstations

On-board power (240 volts) available to run your IT equipment

Hot swappable dual battery

Integrated multi-stage battery charger

Optional composite customisable worktops

Accessories including sliding printer drawer

PC underling and VESA monitor mounts

Increase productivity
with our flexible
solutions

Falcona provide a diverse range of technological and engineering services, supported by world-class levels of service. We manufacture globally, always with the utmost care, attention to detail and quality.

We focus on innovation, ensuring a highly efficient use of processes and materials. This allows us to deliver successful and sustainable solutions for clients across a wide range of industries, including military, telcos, logistics and manufacturing.

SPECIFICATION

Model	MPS1500	MPS2000
Construction	Steel	Steel
Length	880mm	1240mm
Height	935mm	945mm
Width	575mm	575mm
Operating temperature	-10°C to 50°C	-10°C to 50°C
Storage temperature	-20°C to 60°C	-20°C to 60°C
Operating humidity	10–90% non-condensing	10–90% non-condensing

The Powered Carts are tested to be fully compliant with CE branding requirements and a label is affixed to the Inverter housing adjacent to the Serial Number. Individual electrical components are marked with CE branding to show compliance.

BATTERY SPECIFICATION

ELECTRICAL	
Nominal voltage	24 V
Capacity	36 A / 72 A
OPERATING TEMPERATURE RANGE	
Storage (fully charged)	-15°
Charge	-0°
Discharge	-15°

Specification correct at time of publication and is subject to change without prior notice. Please contact us for the most up to date information
