HOORAY FOR HOLIDAYS

This has to be the most exciting time of the year so far - the summer holidays are here!

This means we can wake up at any time of the day we wish, eat ice creams, run in the sand, spend the day in the park, meet our friends and play at being an explorer in the jungle or an astronaut on our way to Mars. And to make these next months even more thrilling, here's IMAGINE THAT, a special boredom-busting book dedicated to the joys of imagining and fun.

Is this going to be THE most special summer ever? We certainly think so.

Hey grown ups...

At Tu, we're on a mission to get the whole nation feeling empowered, confident and comfortable in what they wear. And that extends to the little ones too. We believe in making school uniforms for life, not just lessons. That means clothing which allows kids to be their most creative little selves, both in and out of the classroom.

Like our scuff-resistant shoes, made for kids with moves, and reinforced knees designed for epic explorations. It's also why we made this magazine - to inspire kids to let their imaginations run wild.

Keep your eyes peeled throughout the term for more exciting projects from Tu Clothing and check out what's new in the Sainsbury's School Shop aisle.

Sincerely,
Tu

Tu is available online at [Tu.co.uk](https://www.tu.co.uk) or in selected Sainsbury's stores & at Argos.

IMAGINE THAT was commissioned by Portas Agency and made by Studio Anorak, publishers of Happy Mags for Kids, Anorak and DOT.

It is made by Cathy Olmedillas, Ben Javens, Lee Graham, Miguel Bustos, Adam Highton, Tess Smith-Roberts, Imna Lorente, Elliot Kruszynski and Julia Staite.

IMAGINE THAT

Imagination is our favourite thing (after ice cream). Here's why.

When imagination kicks in, 11 parts of our brain are involved.

Imagination is like having a screen in your brain that plays the most amazing adventure movies.

Or is it more like a third eye that sees things no one else can?

When we use our imagination we create, play and dream - three of the things that make us most happy (not counting ice creams).

The great thing about imagination is that it means we never have to be bored. It helps us create wonderful and exciting stories.

Imagination is fun. Here's the proof:
A flying pig. A talking cat.
A tower block made of marshmallows.
A bee with the head of an elephant.
A bee with the head of an elephant.
What can you imagine?

What is this?
A stick?
"No," says imagination.
It is a magic wand that gives us superpowers.

It is thanks to imagination that we have built rockets to go to Mars, that we invented bicycles and that we make art.

We imagine during the day and imagine during the night when we are dreaming.

Imagination is for humans and, it seems, for some animals too. Monkeys, dogs and rats are thought to be able to imagine things, and even to dream.

TELL THE STORY

What are these friends doing? It is up to you to decide. Write in the speech bubbles what you think they are saying to each other.

YAY! FOR RAINY DAYS

It might be pouring outside but that doesn't stop us from having fun. Here are a few things to do when the heavens open.

Turn an image into a jigsaw

Take a picture you like from a magazine or old book. Cut it into shapes. Stick each piece on some cardboard. Now give them to one of your friends so they can recreate the image. See if they can guess what it is first!

Make some jewellery

Did you know that pasta tubes make excellent necklaces? They do! Take some uncooked pasta and a piece of string long enough to work as a necklace. Thread the pasta tubes through it. Now, using paint, draw some patterns on the pasta such as dots and stripes. Leave to dry overnight. You can also make bracelets the same way, using a shorter string.

Be a hunter-explorer

Your house is filled with treasures ready to be found. Pick a few of them, such as a piece of jewellery, a book or a special treat. Hide them around the house. Draw a plan of the house and put crosses where the treasures are hidden. Invite one of your friends to find their exact location.

Make a magic book

Take a bunch of sticky notes or an empty notebook. On page 1, draw a sun at the top of the page. On page 2, draw it slightly further down. Repeat and repeat. On the last page, at the bottom, draw a half-sun. Now flip the pages and see your sun setting. Magic!

Be a lemonade seller

Take some lemons and cut them in half. Squeeze all the juice out of them into a large jug. Add 3 or 4 spoons of sugar, a few sprigs of mint and some ice cubes. Invite your friends and family to come and try your lemonade. Charge them 50p per glass and give the money to a charity or a homeless person.

Have a picnic indoors

Too rainy out there for a bite to eat in the park? No problem. Take your picnic into the lounge instead! Set a picnic blanket (or a sheet), make some cheese or ham sandwiches, bring a bottle of fruit juice and start a game of I Spy. Picnic Day is saved!

Spotting & Jotting

Are you ready to become a Spotter and Jotter? Great! Take IMAGINE THAT outside and record all the things you see here.

STICK ART

Go outside and pick up some sticks of all lengths and sizes. Back home, dip the sticks into coloured pots of paint. Use them to draw a face unto the shape below. Add a mouth, hair, nose and a funny spotted skin. Give your face a name starting with any of these letters: **S, T, I, C, K.**

SPOT THE DIFFERENCE

There are 15 differences between these two scenes. Can you spot them?

SHAPE UP

Cut out the shapes from the following spread. Use them to create a rocket, a pine tree or a character – just like the examples shown here.

Jungle colouring

OCTOPUS FACE

Would you like to transform into an octopus? Here's how!

You will need: a paper plate, card, paint, a pencil with an eraser on the end, elastic

1

Cut the paper plate in half.

2

On the back of the plate, mark where you need the eye holes to be and cut out. Draw a curved notch where the nose will be and cut it out.

3

Paint the mask and set aside to dry.

4

On the card, draw eight tentacles. Make them nice and curly and of different lengths!

5

Cut out the tentacles and paint them.

6

Dip the eraser on the end of a pencil into paint and use it to stamp suckers onto the tentacles. You can use the same method to add some detail to the mask too!

7

When the tentacles are dry glue them along the bottom of your mask

8

Poke a hole in each side of the mask with a sharp pencil and thread a piece of elastic through. Knot to secure. Your mask is ready to take you on an undersea adventure!

COUNT IN SPACE

Blue stars Moons Aliens Comets

Red stars Planets

Blue stars: 7 Aliens: 3 Comets: 4 Red stars: 8 Planets: 6

Leaf Art

Go outside and carefully pick up some leaves that have fallen from trees or bushes. Pick many different colours. Back home, wash and dry the leaves, then put them inside a book and press down hard. Now stick the leaves down over the butterfly shape below, cutting them to fit. Give your butterfly a name starting with any of these letters: **L, E, A, F.**

A CAR MADE FOR RACING

You'll need to wait a while before you can drive a real car. But you can start training to be a racing champ right now with this amazing one! Make it, step into it and... ZOOM!

You will need: a large cardboard box, two paper cups, ribbon or string, and paint.

1 At one end of your box, cut off the two long flaps. On one of the long sides, draw the shape of your racing car. Cut off the top section of this side, but do not cut anything off any of the other sides yet.

2 Use the piece you cut off to draw the same shape on the other long side, then cut off this top section. Score and fold in the side with the flap that will be at the front of your car.

3 Trim the width of each flap and push the one at the back backwards to make a spoiler.

4 For the windscreen, cut out a section of the front flap using a scalpel. Leave about 3cm around all sides.

5 On the front, draw around the base of two paper cups where you would like the headlights to be. Cut out holes slightly bigger than the circles you have drawn and push the paper cups in.

6 Using the offcuts of cardboard from the car, draw and cut out four circles for the wheels, and four smaller circles for the hub caps. Paint them and leave to one side to dry. Now paint the rest of the car.

7 To make the car wearable, you need to add some shoulder straps. Cut small slits just below the windscreen and spoiler, making sure they are not too far apart for your shoulders. Thread one end of the ribbon or string through the slit by the windscreen and knot to secure. Thread the other end through the spoiler slit and knot. Repeat on the other side.

Your car is now ready to race!

Cooking is not only the best fun, but it is also the most rewarding of activities, because we get to eat something nice at the end of it.

Here, we learn how to cook a rainbow.

Well, a smoothie made out of rainbow! How magical is that?

You will need:

- 1 orange
- 1 kiwi
- 1 pineapple
- 2 bananas
- 1 bag of frozen berries (including blueberries)
- 2 cups of milk (can be soya or almond milk for vegans)
- Handful of pumpkin seeds
- Blender
- Non-stick frying pan
- 1 bowl

Step 1: Peel the orange and take out 4 segments. Remove the hairy coat of the kiwi and cut it into 4 slices. If you want it to be super fancy, cut it into star shapes! Peel the pineapple, slice it into discs and cut each disc into triangles. Peel one of the bananas and cut it into chunks.

Step 2: Put all the frozen ingredients into the blender with the milk and the other banana. Now whizz until you get a smooth texture. If it is too thick, add a bit more milk (one spoon at a time).

Step 3: Toast the pumpkin seeds in a non-stick frying pan, without any oil, for 5 minutes.

Step 4: Take a bowl and transfer the frozen fruit mixture into it.

Step 5: Decorate the smoothie with the peeled fresh fruits and the toasted pumpkin seeds.

Step 6: And now comes the most important step of all...
SLURP!

A RAINY ADVENTURE

This story has lost its pictures and needs your help. Draw the actions inside the clouds.

Nuria and Jack were bored. It was raining cats and dogs outside. Their plans to go and play in the park were now cancelled. "Nooooooo!" they both sighed.

Jack and Nuria spotted something extraordinary in the rain. "Is it? Yes, it is! A boat!" shouted Nuria. "Greetings," said its captain. "I am Otto the Octopus."

"How about we make an Anti-Soaking costume to keep us dry?" proposed Nuria.
"That's a good idea! But that could take aages." said Jack.
"Wait! Can you see what I see?" said Nuria. "Oh WOAHH, what is that?" said Jack.

Nuria and Jack jumped on board. "Lots and lots of rain is a great thing when one has a boat... and a bit of imagination!" concluded Otto.
