Don't add water from the hole, will destroy the product!

ULTRASONIC AROMA DIFFUSER

Model: KS-AD01
Voltage: DC-5V
Power: 5W

Container: 100ml
Material: PP
Ultrasonic frequency: 3.0MHz

INNOKA

ULTRASONIC AROMA DIFFUSER

USER MANUAL

Attention

Do not use high purified & distilled water.

MODEL : KS-AD01

PLEASE READ AND SAVE THESE INSTRUCTIONS

IMPORTANT INSTRUCTIONS

1. Please read this instruction before using.
2. Please choose a right power adapter to match the voltage DC-5V and electric current: 1A.
3. It is forbidden to add water from the spray hole.
4. Please use pure water or tap water, not use hot water or corrosive liquid.
5. Please do not use sharp object to touch the spray hole to avoid any damage.
6. The mist concentration might be different as it is affected by water quality, humidity, temperature and wind direction.
7. Corrosivity liquid will damage the machine. Before changing a new type of essential oil, please clean the unit according to the maintenance instruction. Use only 3-5 drops per 100ML water each time.
8. To avoid accidents, this appliance is not allowed to be used by children, the old or patients who lose their life self-care ability if without the guardianship of normal adults.

PART FIGURE

9. If the power cord is damaged or under other unusual condition, please send it to the professional staff to repair, do not repair it by yourself.

10. **DISPOSAL:** Do not dispose of electrical appliances as unsorted municipal waste, use separate collection facilities. Contact your local government for information regarding to the collection system available.

11. If electrical appliances are disposed in landfills or dumps, the hazardous substances can leak into the groundwater and get into the food chain that will damage your health.

OPERATING INSTRUCTION

1. Rotate the head part anticlockwise and take it out of the water container.
2. Pour some water (above 35ml) into the water container, but don't exceed the maximum water level marked in the container. Please don't add water inside when the machine is working.
3. Drop 2-3 drops of essential oil into water. 2-3 drops (about 0.1-0.15ml) essential oil per 100ml water is suggested.
4. Assemble the head part on the water container and confirm if they fit good enough.
5. Connect USB cord with any USB power source, then the machine is on standby. Please make sure the power supply is DC-5V.
6. • Press the on/off button once, the indicator will turn RED and the appliance will be in the Humidifier Mode.
• Press the on/off button again, the indicator will turn BLUE and the appliance will be in the Aroma Diffuser Mode.
• Press the on/off button one more time, the indicator will be off and the appliance is in the Standby Mode.
• The Default Up Time of each Working Mode of the

appliance is 8 Hours.

7. When the water runs out, the indicator light will flash for 10 seconds to remind adding water. If water is not added in time, the machine will be on standby.

8. In order to prevent bacteria buildup, before storing the machine, please pour out the rest of water and clean the vaporizer in accordance with the maintenance steps.

TROUBLE CLEARING

When the machine is in trouble, please check the points as below:

1. Please check if the power adapter has been correctly connected to the machine.
2. Please make sure a matched adapter is chosen to be used. This product works with the standard of DC-5V.
3. Please make sure the water amount inside the container is proper, too much or too little will affect the spray volume.
4. If the machine stops working, please check whether the vaporizer is polluted or not. Please clean the vaporizer according to the maintenance steps.

5. Make sure the air inlet gap is not blocked by sundries or dust.

6. If water runs into the head part by accident, please follow the procedures below:

- 1) Turn off the machine and take off the power cord.
- 2) Separate the head part from the water container.
- 3) Shake the head part gently to drain out the water as much as possible, and put it at a ventilated place for 24 hours to dry it.

CLEANING AND MAINTENANCE

After usage of 5-6 times or 3-5 days, please clean the product as following steps:

1. Turn the machine off and disconnect the power cord. Rotate the head part anticlockwise to remove the head part. Pour out the water and clean the water container.
2. Clean the vaporizer: keep the energy concentrator upwards and remove it. Use a cotton swab to dip some diluted neutral detergent and wipe the vaporizer gently, then clean it with water.

(Please don't wash the head part above the valve which is marked with dotted line as the picture shown on the right side.) After that, please assemble the energy concentrator.

3. Remove the valve when it is dirty, clean it and install again. Please make sure the conical surface of the valve stay upwards.

4. At last, please use wet soft cloth to clean the machine surfaces. (Do not use medical diluent or phenethyl alcohol to clean it, otherwise the product surface will be damaged.)

5. Store the product at a clean and dry place.
