- Compact all-in-one design for plug-and-play use

Powerful brightness with precise beam

- Experience improved visibility

Compatible with major vehicle models

- 12 V and 24 V compatibility for wider application
- Optional connector rings to fit most car models

Highlights

Up to 6500 Kelvin white light

For that modern, high-end style, customise your car with Philips Ultinon Essential LED headlight bulbs. With a colour temperature of up to 6500 Kelvin, these bulbs project a modern white light so you can always stand out from the crowd with a stylish beam.

Reliable dual heat dissipation

Optimal performance with superior durability places Philips Ultinon Essential LED headlight bulbs at the forefront of LED technology. Thanks to the dual heat-dissipation mechanism — built-in fan and an aluminium heatsink with anodising coating — these LED headlight bulbs disperse heat more effectively and efficiently. They can perform at their highest level of brightness for a longer period of time.

Compact all-in-one design

Philips Ultinon Essential LED uses a brand-new bulb design that integrates the driver-box electronics into the body, allowing more

space for the bulb in the headlamp and making fitting easy. Enjoy the plug-and-play experience: the one-piece design allows the centre ring to be taken out from the top easily, without unscrewing. Philips Ultinon Essential LED with its compact design fits a wide range of car models and can be easily installed by specialist mechanics.

Powerful brightness

The uniform, accurate beam pattern lets you see and be seen more clearly. Thanks to the precise optical design of Philips Ultinon Essential LED, the light is projected just where you need it on the road. Not only will you be able to spot obstacles faster and drive with more confidence, you'll avoid blinding other drivers with dangerous glare, making everyone safer on the road. For a sharp beam, it's also important that the bulb is correctly positioned in your headlamp. Using the adjustable connector rings, you can ensure perfect alignment for optimal light performance and enhanced road safety.

12 V and 24 V compatibility

Philips Ultinon Essential LED is a perfect fit for a wide range of vehicles and is compatible with both 12 V and 24 V electrical systems. Reach out to anyone of our authorised partners or call centre for further details.

Long-lasting performance

With over 100 years of automotive lighting experience, Philips lighting ensures that our Automotive-Grade Quality products are designed and developed following strict quality-control processes (including applicable ISO norms), leading to consistently high production standards.

Optional connector rings

Because H7 headlights feature a wide variety of lamp brackets, you can sometimes have trouble fitting LED lights, but not with Philips Ultinon Essential LEDs. Optional Philips LED connector rings ensure that they fit the largest selection of car models, so you can buy Philips LEDs with peace of mind.

Specifications

Packaging Data

EAN1: 8719018003843

EAN3: 8719018003850

Packaging type: X1

Product description

Technology: LED

Application: High beam, Low beam

Range: Ultinon Essential LED

Type: LED-HL [-H7]

Homologation ECE: NO

Designation: LED-HL [-H7]

Base: PX26d

Electrical characteristics

Wattage: 20 W

Voltage: 12 V and 24 V

Marketing specifications

Expected benefits: Style

Product highlight: Philips LED lamps

Light characteristics

Colour temperature: 6500 K

Lumens: 1700
