

Moon Disk | Installation Guide

The Moon Disk uses a unique center-mount method to attach to the wall. This wall-mounting method allows you to rotate and position the piece on your wall in any orientation that you'd like. Enjoy!

TIP: Place a finger on the Threaded Insert to guide it on to the Threaded Rod.

A WORD OF CAUTION:

- + This wall-mounting method is extremely secure, but is not typical.
- + Always keep ahold of the Moon Disk while rotating on to threaded rod.
- + Do not let go of the Moon Disk until it is securely attached to the threaded rod.
- + Use caution when rotating the Disk counterclockwise. Rotating the Disk too far counterclockwise will remove the Disk from the threaded rod.
