

facial trauma pack

Product Code : DPC

For post-maxillofacial and dental procedures

FINDING THE BALANCE

Nurses are very creative and over the years have devised some weird and wonderful ice packs to help ease their patient's facial pain. The hidden cost in the packs is not realistic or sustainable for a busy clinic.

Medichill's **Australian-made** Facial Trauma Pack is the answer from around \$3 per patient

A survey of day surgery reviews are summarised below in a ranking of 1 - 10. 1 being poor and 10 exceptional.

Ease of use FOR STAFF

Ease of use FOR PATIENTS

Ability to stay in place

Adjustability

Quality

OTHER COMMENTS

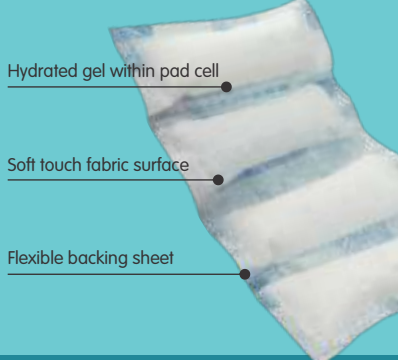

- Better infection control
- Patient's love that they can take them home
- Does not dig in like our hospital-made version
- Easy to use and doesn't slip down like others

Simple to use

LOW PROFILE & LIGHTWEIGHT

Hospital Review

The new Medichill dental covers that we use post operatively with our clients here at St John of God Hospital are a hit. Not only with the patients as they are comfortable and create good cool compress contact with the patients face, but also with the nurses as we now don't have to be embarrassed by using the disposable underwear that we would fashion into a holding device for our ice packs. Thank you Medichill.

*Based on purchase of 4 x 50 units. Each unit contains 50 head covers and 100 Cool Cube sheets.
