

### FINDING THE BALANCE

Nurses are very creative and over the years have devised some weird and wonderful ice packs to help ease their patient's perineal pain after childbirth. The hidden cost in the packs is not realistic or sustainable for a busy maternity ward.

Medichill's **Australian-made** Perineal Cool Pads are the answer

A survey of maternity wards each with a minimum 1000 vaginal births per annum, were canvassed, the following summarizes their response.

All agreed main Medichill benefits

Impact on patient bed turnover through earlier ambulation

Financial impact on ward

Either reduction in Physio or Pharmacy costs. Balance were making their own ice packs and neglected to include staff costs.

### Medichill Cool Cubes

Hydrated gel within pad cell

Soft touch fabric surface

Flexible backing sheet

### What are Medichill Perineal Cool Pads?

The Perineal Cool Pads absorbs and retains clean water, that can then be frozen or chilled to offer a comforting, medication-free solution to pain and soreness to the perineum.

EFFICIENT ECONOMICAL CLEAN PROFESSIONAL  
And takes the pain out of providing pain relief

Medichill Cool Cubes - Successfully used in hospital wards for over 25 years

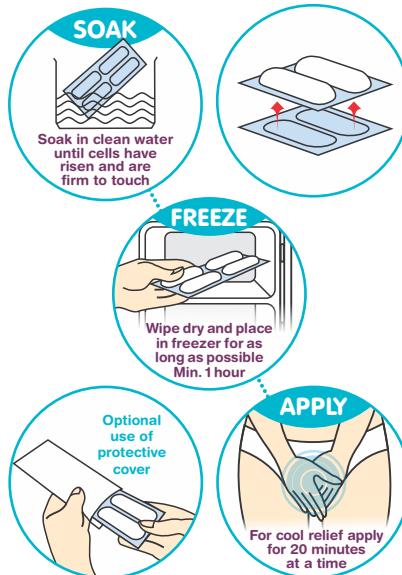

Patients can easily prepare and apply themselves

- Professional and economical
- Minimises cross infection
- Stays dry when thawing
- Easy to store
- No expiry date
- Ammonium Nitrate free
- The ladies love them!

A safe, non-invasive alternative to oral analgesia

### Simple to use

### LOW PROFILE & LIGHTWEIGHT

You apply by:

- by inserting into sanitary napkins,
- in a disposable Medichill cover,
- through own underwear,
- held on-site by hand

A key feature that guarantees even greater economy and patient comfort

Every woman's needs differ, with Medichill you have the option to cut between the cells to treat a smaller traumatised site or provide relief from haemorrhoids.

“...I have just come out of hospital and used these fantastic ice pads. The hospital couldn't give me any more than a couple which I have already used.”

S. Champkin  
Patient,  
Maternity Ward  
Royal Berkshire  
Hospital
