PHARMACIST

Each capsule of Lactoferrin Gold 1.8® contains over 400 mg of the following active ingredients: Lactoferrin, Zinc, Vitamin C, Beta-glucan, Inulin and Turmeric root extract.

Ingredients never work alone. When a single ingredient is isolated from a food source, it's no longer surrounded by its native cofactors. These cofactors are often required for "activating" the ingredients. The Lactoferrin Gold 1.8® formula was designed and tested by a team of scientists with these considerations in mind. The formulation contains the correct co-factors, in precise ratios, to ensure maximum absorption and optimal results

A single capsule of 60 mg/day by mouth is the suggested dosage as part of regular replenishment for a normal healthy individual.

However, depending upon the lifestyle, age and health-status, increasing the dosage to 2 or 3 capsules per day could benefit certain individuals. It can be taken anytime of the day, with or without food.
